B.P. No. —Mis.—

Dated 21-9- 1871

Not to be folded or roughly handled

Read the following letters :—

No. 500. From Major J. BEATTY, R.E., Acting Superintending Engineer, Godavery, to Major-General G. W. WALKER, R.E., Secretary to Government, Public Works Department, dated Dowlaishweram, 26th August 1875, No. 1,608.

WITH reference to the Orders of Government, Nos. 104 and 2,119, of 14th and 24th ultimo, respectively, I have the honor to inform you that up to this date the Marine Department has only taken charge of the steamer *Frank and Ada* and the dredge No. 1. I send, herewith, as directed, a copy of the receipt given by the Master Attendant.

2. The dredge No. 2 and the twelve sea punts are still in charge of this department, together with a large quantity of stores belonging to the dredges and punts. The Range Officer has informed the Master Attendant that he is prepared to attend and hand them over, and for some reason not clearly understood but apparently having connection with their present state of repair, Captain Castor hesitates to take over charge.

3. I suggested that it was open to him to make any remarks in the transfer certificate with regard to the condition of the dredge, her stores, &c., but as yet even this has failed to produce the desired effect.

4. As regards the dredge No. 2, she has not lately received ordinary repairs, such as painting, caulking, &c., but when some of her buckets have been repaired she will be in perfect working order, though of course she would be the better of ordinary repairs. Eighteen of her buckets have been lately repaired and are now ready for use, but a number of the spare buckets are out of repair, and I have directed the Dredge Superintendent to send these into the workshop at once.

5. Both the harbour dredges were constructed so far back as 1859-60, and having been ever since in salt water are believed to require rebottoming.

6. Of the twelve harbour punts, one was new in 1871-72 and is believed to require only ordinary repairs, six others (including two now in the workshop at Dowlaishweram) have received special repairs within the last few years, the remaining five are in bad order and in need of special repairs.

7. As the Marine Department have not taken charge of the dredge, the punts, and the stores belonging to them, some expenditure is going on for the charge of these, but all work has been stopped at the dredging of the river and bar.

8. The expenditure from this year's grant of Rupees 5,000 was Rs. 3,860-5-0 up to 31st July, so that there is a balance of Rupees 1,139-9-0 to hand over to the Marine Department. In addition to this there is a large supply of firewood standing in the accounts at Rupees 1,112-1-6; this may go with the plant, or it may be transferred to other works, and its value paid to the Marine Department, whichever they prefer.

No. 501. From the same Officer, dated Dowlaishweram, 30th August 1875, No. 1,655.

IN continuation of my letter No. 1,608, of 26th instant, I have the honor to furnish, herewith, a statement showing the funds applied for, but not yet allotted, for the repairs (ordinary and special) of the harbour plant in the present official year; and

to request instructions whether either or both kinds of repairs should in future be carried out by this department, as I think it probable that the Marine Department would prefer getting the work done for themselves.

No. 502. ORDER THEREON, 21st September 1875, No. 2,734.

ACCOUNT, No. 22.

THE Master Attendant will be instructed in the Marine Department to arrange that both dredges and all twelve punts be taken over without further delay by his subordinate at Cocanada. The transfer of the dredging work from one department to the other originally proposed in G.O., No. 263 AA, of 1st February, was recommended in Captain Taylor's report of 23rd March, and finally acquiesced in by G.O., No. 1,271, of 5th May. It is not satisfactory therefore to find the transfer delayed by the state in which the plant may happen to be. It is known to have been ill-cared for and worked under former management, but systematic efforts have been made in the last two years to remedy its state. And it would appear from the statements received that the two dredges and five of the punts, one only in want of ordinary repairs, two other punts under special repair, are all but ready for use, and the remaining five still require special repair. These repairs can either be carried out by the Marine Department or given to the Public Works Workshop for execution, as may be desired. The firewood alluded to in paragraph 8 of the first letter under note will be taken over by the Master Attendant, Cocanada, at its valuation in the Public Works Accounts, or that value will be paid over to the Marine Department from any works to which it may be transferred. These are matters which should be arranged departmentally, and not require reference to Government. The date from which final transfer is made by the Public Works to the Marine Department should be fixed not later than the 1st October, and report made of its being duly carried out.

(True Extract.)

(Signed) G. W. WALKER, Major-General, R.E.,
Secretary to Government.

MADRAS

SIR,

With reference to the Orders of Government G.O. No. 10 and 2119 of 7th inst. and my telegram respectively, I have the honor to inform you that up to this date the Marine Department have not taken charge of the Dredges and Punts, nor has any communication been received from the Master Attendant Cocanada, stating when he will be prepared to receive charge.

2. The Dredges Pilot, and the 12 Lascars are still in charge of the Department together with a large quantity of stores belonging to the Dredges and Punts. The Range Officer has informed the Master Attendant that he is prepared to retain and hand them over, and for some reason not clearly understood but apparently having connection with the present state of repair, Captain Taylor considers it his duty to take over charge.

3. I suggested that it was open to him to make any remarks on the transfer certificate with regard to the condition of the Dredge, her stores &c, but as yet even this has failed to produce the desired effect.

4. As regards the Dredge Pax she has not lately received ordinary repairs such as painting caulking &c, but when some of her buckets have been repaired she will be in perfect working order, though of course she would be the better of ordinary repair. 18 of her buckets have been lately repaired and are now ready for use, but as many of the spare buckets are out of repair and I have directed the Dredge Superintendent to send them in to the Workshops at once.

5. From the harbour dredges were constructed so far back as 1859-60, and having been exercised in fresh water are believed to be in good condition.

6. The Pax is during part of the year employed in 1871-72 and is believed to require only ordinary repairs & others (including the vessels in the Workshops at Gosport) have received special attention with the exception of the steam launches which are in hand and need [illegible] repairs.

7. As the Marine Department have not taken charge of the Dredge, the Punts, and the stores belonging to them none expenditure is going on for the charge of these, but all work has been stopped at the dredging of the Inner Harbour.

8. The expenditure from this years grant of Rupees 5000, was Rs 3860-4-0 up to 31st July, so that there is a balance of Rs 1139-4-0 to hand over to the Marine Department. In addition to this there is a large supply of stores on hand standing on the accounts at Rs 1112-1-6, this may go into the Plant, or it may be transferred to other work and its value paid to the Marine Department whichever they prefer.
