Unserviceable Machinery
Mutua Mtr. - intimating
that the estimate for the
repair of the portable
8" pump is awaited
& that the remainder
of the _____ may be
disposed of as suggested
by the Mtr. Insp.

*Proceedings of the Madras Government, Public Works Department,
23rd September 1875.*

Read the following papers:—

No. 535. Endorsement of the District Engineer, Presidency, dated Fort St. George, 11th February 1875, No. 6,127.

From J. N. GRAINGER, Esq., Storekeeper of Machinery, Madras, to Lieutenant-Colonel J. GODDARD, R.E., District Engineer, Presidency, dated Madras, 9th February 1875, No. 93.

I HAVE the honor to forward a List of Machinery which the Superintending Engineer, 1st Division, Kistna, considers unserviceable, and recommends that they should be struck out of his returns and sent to the district stores as old iron; and as the value of the articles exceeds Rupees 500, and is therefore beyond the authority of the Superintending Engineer to dispose of by sale, *vide* G. O., No. 243, dated 27th January 1875, paragraph 4, I have the honor to request that the sanction of Government may be obtained for writing off the unserviceable articles from the returns of the district, and that they be disposed of as recommended by the Superintending Engineer.

SUBMITTED to the Chief Engineer and Secretary to Government, Public Works Department, in reference to G. O., No. 243, dated 27th January 1875, as the value of the articles exceeds Rupees 500.

(Signed) J. GODDARD, Lieut.-Colonel, R.E.,
District Engineer, Presidency.

No. 535-A. Endorsement of the District Engineer, Presidency, dated Fort St. George, 9th September 1875, No. 2,517.

From Lieutenant R. E. HAMILTON, R.E., in charge of the Office of the Storekeeper of Machinery, to Captain ROSS THOMPSON, R.E., District Engineer, Presidency, dated Madras, 7th September 1875, No. 31.

WITH reference to your endorsement No. 6,273, dated 18th February 1875, communicating memorandum from the Under Secretary to Government, Public Works Department, No. 181, dated 11th February 1875, I have now the honor to forward copy of letter from the Executive Engineer in charge of the Kistna District, furnishing the information called for by the Under Secretary to Government, relative to Gough's patent engine and boiler and the portable 8-inch pump.

From Lieutenant D. McN. CAMPBELL, R.E., Executive Engineer in charge, Kistna District, to J. N. GRAINGER, Esq., General Superintendent, Public Works Stores, Madras, dated Masulipatam, 28th August 1875, No. 118.

Your letters Nos. 95 and 19, of 22nd February and 5th August 1875, respectively. I have the honor to observe that the Gough's Patent Engine with boiler and the portable 8-inch pump appear, from the records of this office and the Range Officer's report, to have been received from Madras in 1856-57, their original cost being Rupees 3,924 and Rupees 1,335-8-2 respectively. *Vide* Chief Engineer's letter No. 5,992, dated 18th October 1860. They were used principally on the anicut and its subsidiary channel works, the former was used especially on Nizampatnam works for a long time, and afterwards they were both used on the delta works generally.

*Proceedings of the Madras Government, Public Works Department,
23rd September 1875.*

1864-65, when they became unserviceable by fair wear and tear, but the portable pump seems to be still repairable at some considerable cost, and the Range Officer reports that the necessary repairs can be done in the Bezoarah Factory. If funds are forthcoming the necessary estimate will be submitted for sanction.

2. It does not seem advisable or worthwhile sending any parts of the Gough's engine to Madras. Permission is therefore requested for the disposal of the engine and pumps in question, as also all other articles in statement of unserviceable machinery of 30th November 1874, as they in their deteriorated state are of no value, except as old iron and firewood.

Submitted to the Chief Engineer and Secretary to Government, Public Works Department, with reference to the Under Secretary's memorandum, No. 181, dated 16th February 1875.

(Signed) R. E. HAMILTON, Lieutenant, R.E.,
for District Engineer, Presidency.

No. 536.

ORDER THEREON, 23rd September 1875, No. 2,752.

ACCOUNT, No. 24.

The estimate for the repair of the portable 8-inch pump will be awaited. The remainder of the machinery may be disposed of as suggested by the District Engineer, Kistna.

Sir,

I have the honor to forward a list
of Machinery which the Superintendent
Engineer 1st Division, Coimbatore, considers
unserviceable, and recommends that
they should be struck out of his list,
and sent to the District Stores as old
iron; and as the value of the articles
exceeds Rupees 500. and is therefore
beyond the authority of the District
Engineer to dispose of by sale, under
G. O. No. 2113. dated 27th January 1877.
para 4. I have the honor to request
that the sanction of Government
may be obtained for writing off
the unserviceable articles from
the Returns of the District, and
that they be disposed of as pro-
vided for by the Superintendent
Engineer.

Madras.

Sir,
Your letters No 95 and 19 of 4th
and 5th August 1875 respecting
I have the honor to observe that
the Gough's patent Engine with boiler
and the portable 8" Pump appear
from the records of this office, and
the Change Officer's report, to have
been received from Maulipatam
1856/57, their original cost being
Rs 5934 and Rs 1385-8-2
respectively. These Chief Engineer's
letter No 5992 dated 18th October 1860.
They were used principally on the
Ancient and its subsidiary channel
works, the former was used especially
on the Maulipatam small works for

a long time, and afterwards they
were both used on the Delta works
generally till 1864/65 when they
became unserviceable by fair
wear and tear, but the Portable
Pump seems to be still in use.
