Read the following letters :—

No. 202. From W. B. LEGGATT, Esq., A.I.C.E., Officiating District Engineer, Bellary, to Major-General G. W. WALKER, R.E., Secretary to Government, Public Works Department, dated Bellary, 24th September 1875, No. 1,472.

With reference to G. O., No. 1,961, dated 10th July 1875, on the Bellary Water-supply Project, I have the honor to report that, for the undermentioned reasons, I do not think it would be advisable to remove at present any portions of the revetments in Alipoor and Fischer's tanks that are of faulty construction, for the purpose of rebuilding them.

2. The tank was emptied in the month of April last as already reported, it received another supply on the 4th of June 1875, and there is now 10.5 feet of water in it measured at the sluice; and a few hour's continuous rain on the hills to the west of Alipoor would probably fill the tank. The registered fall of rain on the night of the 22nd is 3 inches and 10 cents. This water will have to be retained until next March or April before it can be let down to Bellary, unless it is run to waste.

3. There is also water in Fischer's tank; and all that can be done this year is to build—

1st.—The revetment and regulating dams in the supply channels;

2nd.—Retaining wall, &c., to calingulah; and,

3rd.—Revetment to the branch channel leading to the Fort ditch reservoir.

4. As much new stone as possible will be collected at the tank near the portions of the revetment to be rebuilt, so as to commence work immediately opportunity offers.

5. I beg to add, that it will not be possible, under existing circumstances, to expend advantageously more than a sum of Rupees 3,500 this year out of the allotment of Rupees 10,000 for the project in question.

No. 203. From the same Officer, dated Bellary, 27th September 1875, No. 1,495.

I HAVE the honor to request that you will be so good as to obtain the early orders of Government for transferring the sum of Rupees 6,500 surrendered in my letter No. 1,472, dated the 24th instant, from the grant of the Bellary Water-supply Project, to the undermentioned works in the Bellary Range, in the proportion entered against each, viz. :—

I.—Constructing new Barracks and Band Barracks for	rs.
European Infantry	4,800
II.—Constructing two Armourers' Shops for the use of the	
Native Infantry Regiments	1,700
Total	6,500

2. I may mention that in the event of the additional allotments now applied for being granted, the first-named work will be fully completed during the current official

With reference to G.O. No. 1961, dated 10th July 1875, on the Bellary Water Supply Project I have the honor to report that for the undermentioned reasons, I do not think it would be advisable to remove at present any portion of the periments in Alipoor and Fischer's Tanks that are of faulty construction for the purpose of rebuilding them.

2. The tank was emptied in the month of April last as already reported, it received another supply on the 6th of June 1875, and there is now 10.5 feet of water in it measured at the sluice; and a few hours continuous

rain on the hills to the West of Alipore
would probably fill the tank. The register
of fall of rain on the night of the 22nd
is 3 inches and 10 cents. This water will
have to be retained until next March
or April before it can be let down to
Bellary, unless it is found to waste.

3. There is also water in Fischer's tank,
and all that can be done this year is
to build.

1st The retention and regulating dams
in the Supply Channels.

2nd Retaining walls & fish traps and

3rd Retention to the branch Channel leading
to the Fat ditch reservoir

4. As much new stone as possible will
be collected at the tank near the junction
of the reservoir to be rebuilt so as to
commence work immediately after
open.

5. I beg to add that it will not be
possible under existing circumstances to
expend advantageously more than a
sum of Rs 3,500 this year in the allo-
cation of Rs 10,000 for the Project.
