Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
7th December 1875.*

No. 91. Read the following letter from Major J. W. HINDLE, Officiating District Engineer, Vizagapatam, to Major-General G. W. WALKER, R.E., Secretary to Government, Public Works Department, dated Waltair, 25th November 1875, No. 1,401:—

WITH reference to G.O., No. 829, dated 24th March 1875, I have the honor to inform you that the present drainage of the regimental lines at Vizianagram is, in my opinion, quite sufficient (semi-solid matter will stick even at an angle of 45°) if properly flushed by the Regimental authorities, who have a staff for the purpose.

2. The ryots will not utilize the sewage as it passes through paddy-land. If heavy rains occur the sewage is washed away first and all that overflows is simply rain water.

3. The fall of the ground does not permit of any greater slope, and I do not think that it is necessary. The design was made by Major Beatty, R.E., after very careful inspection.

No. 92. ORDER THEREON, 7th December 1875, No. 3,459.

MILITARY WORKS, No. 2.

A REPORT of this nature was uncalled for, and appears to have been made by Major Hindle in the process of getting rid of unanswered references previous to going on furlough. What he should have reported was, whether the suggestions of the Sanitary Commissioner had been acted on as ordered in G.O., No. 829, of 24th March.

2. The flushing and cleansing of the recently constructed drains will doubtless be carefully attended to by the Regimental authorities.

(True Extract.)
