Public Works DEPARTMENT

G.O. No.	455	Press
B.P. No.		Mis.
Dated	17-2	195

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
17th February 1875.*

Read the following papers:—

No. 400. Proceedings of the Madras Government in the Revenue Department, dated 5th January 1875, No. 10:—

Proceedings of the Board of Revenue, dated 1st December 1874, No. 3,469.

From W. D. HORSLEY, Esq., Collector of Cuddapah, to J. GROSE, Esq., Secretary to the Board of Revenue, dated Kadiri, 20th October 1874, No. 244.

I HAVE the honor to reply to the Board's Proceedings, No. 7,514, dated November 18th, 1867.

2. In accounting for the delay I have to explain that, on the 20th August 1869, Mr. VansAgnew, the late Collector, asked the then Superintending Engineer for information regarding the outlay on new works of irrigation for many years back, in order to furnish the information required in paragraph 5 of the Proceedings under reply. That reference was not finally answered by that department till the 17th March 1873, when the late District Engineer expressed his inability to furnish further information called for on the subject, and referred me to the Monthly Progress Reports for the particulars.

3. Again, I addressed the District Engineer on the subject very lately, as the information of outlay on new irrigation works was not complete for all the ranges in the district during the years for which the information was said to be available. To my last reference I received the District Engineer's reply only on the 9th instant.

4. I forward four statements, marked A to D. Statement A shows the new and important projects of irrigation which, if constructed, would increase the food-producing powers of the district and augment the revenue as well. Statement B shows some of the works constructed by former native governments, and which, if improved or repaired as suggested, would prove beneficial to both the ryots and Government. Statement C gives the information required in paragraph 4. Statement D shows the amounts spent on new irrigation works for a series of years, ranging from 1856-57 up to 1872-73, together with the revenue derived by Government on wet lands throughout the district in those years.

ENCLOSURES Nos. 1 to 6.—Statements.

THESE suggestions by the Collector of Cuddapah, with regard to new projects of irrigation likely to increase the food-producing powers of the district, will be submitted for the information of Government.

2. Three new tanks are mentioned as possible. The cost is estimated at Rupees 20,000 and the resultant revenue at Rupees 4,544, or more than 22 per cent. on the cost.

3. The Collector thinks that nine old tanks, long since in ruins, might be restored. The estimated cost is Rupees 68,700 and the estimated revenue Rupees 14,668, or more than 21 per cent. on the cost.

4. In 1870-71 the Collector proposed to spend Rupees 1,50,162 in repairing 353 works, and Rupees 40,951 were sanctioned. In 1871-72 he proposed to spend Rupees 1,31,239 in repairing 263 works, and Rupees 70,000 were sanctioned. In 1872-73 he proposed to spend Rupees 1,43,400, and Rupees 42,792 were sanctioned.

Proceedings of the Madras Government, Public Works Department,
17th February 1875.

5. One of the statements shows that the expenditure on new irrigation works from 1856-57 to 1872-73 is less than 1 per cent. on the revenue from irrigated lands.
(A true Copy and Extract.)

(Signed) J. GROSE,
Secretary.

Irrigation, No. 2.

REFERRED to the Public Works Department
for consideration.

(True Extract.)

(Signed) C. G. MASTER,
Acting Secretary to Government.

No. 401.

Note by the Chief Engineer for Irrigation.

In my opinion the Public Works Establishments in the Cuddapah District are altogether inadequate to undertake the investigation of new projects, and with the Godavery, Kistna, Nellore, and Tanjore Districts under-officered it does not seem probable that at any early date such a re-inforcement can be sent to Cuddapah as will allow of the very neglected state of that district, as regards its irrigation works, being properly dealt with. The very moderate amounts made available for irrigation repairs have not, during the last two or three years, been utilized, and it is hopeless to suppose that any advantage would result from diverting attention from existing works to others which it may be desirable to bring into existence, but which should apparently wait until they can be attended to without still more neglecting those which have the prior claim.

CAMP, KISTNAGHERRY,
13th January 1875.

(Signed) JOHN MULLINS, Lieut.-Colonel, R.E.,
Chief Engineer for Irrigation.

No. 402.

ORDER THEREON, 17th February 1875, No. 455.

IRRIGATION, No. 26.

The Government regret that there is no immediate prospect of the Public Works Establishments in Cuddapah being so far strengthened as to allow of any new projects being investigated however promising they may appear to be. But the earliest opportunity that offers for strengthening the establishment will be availed of.

(True Extract.)

Colonel, R.E.,

Secretary to Government.

To the District Engineer, Cuddapah.

D.

Statement showing the amount expended on new irrigating works and the revenue derived from irrigated lands in the District of Suddapah from 1856-57 to 1872-73.

Years.	Amounts expended on new irrigating works.	Total revenue of all the irrigated lands in the District.	Remarks.
1	2	3	4.
1856-57	3744	1157722	The figures entered in column 3 have been taken from Statement No 3 of Cultivation submitted with the Jamabandi reports.
1857-58	22055	946328	
1858-59	16806	884590	
1859-60	3979	944823	
1860-61	3916	673738	
1861-62	23532	673465	The statements submitted with the reports for 1856-57 to 1864-65 represent the cultivation of the District under three separate heads viz. Dry, Garden and wet. The figures entered in column 3 of this statement are for wet only.
1862-63	12280	713169	
1863-64	1861	672384	
1864-65	2063	709682	
1865-66	2553	1284688	
1866-67	451	1031129	The statements for 1865-66 to 1868-69 contain only two heads viz. wet and dry, the figures of garden cultivation being included in those of wet. The figures entered in column 3 of this statement are those entered under wet in the Jamabandi reports.
1867-68	21923	925720	
1868-69	8372	992824	
1869-70	4957	808441	
1870-71	5510	875457	
1871-72	4651	775562	In 1869-70 the assessment on wet and garden lands depends on wells was reduced to the highest dry rate and those lands were classed as dry. The figures in column 3 of this statement are therefore much lower than those in the statement for that year.
1872-73	219	876032	
Total	138877	14724744	

Foot Note. Information regarding the estimated revenue of the irrigated land included in the statement is not being available, no figures have been entered here.

There is no Ayakhat under any of the above works at present. Columns 6 to 11 of this statement represent the area and water rate of Government and Inam dry lands, which will form the Ayakhat of the irrigation works when it is restored and improved as above suggested.

Ramabharany
Asst. Collector
Cuddapah

E. C. M.

No. 7,514.

PROCEEDINGS OF THE BOARD OF REVENUE, dated 18th November 1867.

1. The Board resolve to call upon all Collectors to report, at their early convenience, upon the wants of their respective Districts in regard to irrigation works.
2. A list of all new and important projects of irrigation which are calculated to increase the food-producing powers of their Districts, but the construction of which has been postponed for want of funds, or for any other cause, should be submitted, and new schemes of the same description should be sought out and brought forward. There are few Revenue Officers possessing a thorough knowledge of their charge, who are not aware of many promising projects of irrigation, and no time should now be lost in bringing them to notice in view to their practicability being tested. In many unfrequented parts of the country, too, there are remains of important irrigation works, constructed by the old Native Governments but long since in ruins, which are well worthy of investigation, as to whether it would not be advantageous to restore them, or to construct new and improved works on their sites.
3. Where possible, a rough estimate of the approximate cost of each work should be given, and of the probable return likely to be realized, should they be constructed.
4. The Collectors annually bring before the Board the condition of the existing irrigation works in conformity with the instructions contained in Board's Standing Circular, No. XXIII., dated 15th March 1864, but, with the report now called for, they are requested to submit a Statement showing the area of the ayacut and of the cultivation under each work for the last three years, and the amounts proposed by the Collectors to be expended on irrigation repairs in each year contrasted with the sum actually granted in the annual Budgets, and the sufficiency or otherwise of the latter amounts should be shown.
5. The Public Works Reports, submitted by Collectors each year in conformity with the orders of Government, under date 20th September 1860, No. 1,656, should also be consulted, and the amount expended upon new irrigation works each year should be given for as many years back as the information is readily available, whether from these reports or other sources. The revenue derived from all the irrigated lands of the District in each of these years should be stated, in view to showing the advantages that have been obtained by this outlay on new works, and where possible the estimated revenue of the irrigated land included in the alienated rent-free and favourably assessed tenures (Inams) should be added in a foot-note, but, of course, where an Inam village is in no way dependent for its water supply on Government works of irrigation, it should be excluded from the calculation.
6. In submitting the report now called for, Collectors are requested to be specially careful to quote, by date and number, any previous correspondence which may have taken place in regard to any of the matters brought forward, and they are particularly requested to forward the report within some reasonable period, say at the latest in two months.

*Proceedings of the Madras Government, Revenue Department,
5th January 1875.*

No. 21. Read the following Proceedings of the Board of Revenue, dated 1st December 1874, No. 3,469:—

Read the following letter from W. D. HORSLEY, Esq., Collector of Cuddapah, to J. GROSE, Esq., Secretary to the Board of Revenue, dated Kadiri, 20th October 1874, No. 244:—

I HAVE the honor to reply to the Board's Proceedings, No. 7,514, dated November 18th, 1867.

2. In accounting for the delay I have to explain that, on the 20th August 1869, Mr. VansAgnew, the late Collector, asked the then Superintending Engineer for information regarding the outlay on new works of irrigation for many years back, in order to furnish the information required in paragraph 5 of the Proceedings under reply. That reference was not finally answered by that department till the 17th March 1873, when the late District Engineer expressed his inability to furnish further information called for on the subject, and referred me to the Monthly Progress Reports for the particulars.

3. Again, I addressed the District Engineer on the subject very lately, as the information of outlay on new irrigation works was not complete for all the ranges in the district during the years for which the information was said to be available. To my last reference I received the District Engineer's reply only on the 9th instant.

4. I forward four statements, marked A to D. Statement A shows the new and important projects of irrigation which, if constructed, would increase the food-producing powers of the district and augment the revenue as well. Statement B shows some of the works constructed by former native governments, and which, if improved or repaired as suggested, would prove beneficial to both the ryots and Government. Statement C gives the information required in paragraph 4. Statement D shows the amounts spent on new irrigation works for a series of years, ranging from 1856-57 up to 1872-73, together with the revenue derived by Government on wet lands throughout the district in those years.

ENCLOSURES Nos. 1 to 6.—Statements.

THESE suggestions by the Collector of Cuddapah, with regard to new projects of irrigation likely to increase the food-producing powers of the district, will be submitted for the information of Government.

2. Three new tanks are mentioned as possible. The cost is estimated at Rupees 20,000 and the resultant revenue at Rupees 4,544, or more than 22 per cent. on the cost.

3. The Collector thinks that nine old tanks, long since in ruins, might be restored. The estimated cost is Rupees 63,700 and the estimated revenue Rupees 14,668, or more than 21 per cent. on the cost.

4. In 1870-71 the Collector proposed to spend Rupees 1,50,162 in repairing 353 works, and Rupees 40,951 were sanctioned. In 1871-72 he proposed to spend Rupees 1,31,239 in repairing 269 works, and Rupees 70,000 were sanc-

Requesting Collectors to report on wants of their Districts in regard to irrigation works.

tioned. In 1872-73 he proposed to spend Rupees 1,43,400, and Rupees 42,792 were sanctioned.

5. One of the statements shows that the expenditure on new irrigation works from 1856-57 to 1872-73 is less than 1 per cent. on the revenue from irrigated lands.

Note by the Chief Engineer for Irrigation

In my opinion the Public Works establishments in the Cuddapah District are altogether inadequate to undertake the investigation of new projects, and with the Godavery, Krishna, Nellore, Tanjore Districts under officered it does not seem probable that at any early date such a re-inforcement can be sent to Cuddapah as will allow of the very neglected state of that District, as regards its irrigation works, being properly dealt with. The very moderate amounts made available for irrigation repairs have not during the last 2 or 3 years been utilized, and it is hopeless to suppose that any advantage would result from diverting attention from existing works to others which it may be desirable to bring into existence, but which should apparently wait until they can be attended to without still more neglecting

Pro: of the head and
in the Rev. Sept. } H.E. No 10 of 5 Jan 75
Chief Engr. for Irrigation (" " 61-13-00)

The Government regrets
that there is no immediate
prospect of the Public Works
Establishments in Cuddapah
being so far strengthened as
to allow of any new projects
being investigated, however
promising they may appear
But the earliest op-
portunity that offers for
strengthening the establishments
will be available
Ch. Engr. bearing that
in mind the
The District Engineer Cuddapah
Chief Engr. for Irrigation
Revenue Department
The Undy believe the
2/11
19-2-75

Having the work of the brick bond
 and the commonest vegetation work
 of the respective class - But the work
 being admitted here can be done into here

I think it will
 be simple to add
 the brick - that
 we will take the
 quality to be put into
 of the thing then
 the last - 2

The brick
 will be
 the same
 as the
 one
 that
 was
 used
 in
 the
 last
 year
 and
 the
 same
 as
 the
 one
 that
 was
 used
 in
 the
 last
 year
 and
 the
 same
 as
 the
 one
 that
 was
 used
 in
 the
 last
 year
