*Proceedings of the Madras Government, Public Works Department,
12th March 1875*

No. 314. Read the following letter from Major C. H. LUARD, R. E., Officiating Under Secretary to the Government of India, Public Works Department, (Railway,) to Colonel G. W. WALKER, R. E., Secretary to the Government of Madras, Public Works Department, (Railway,) dated Fort William, 24th February 1875, No. 519 R —.

It having been brought to the notice of the Government of India that the East Indian Railway Company make a refund of the balance of fares when from some unexpected cause, such as illness, or other equally good reason, passengers terminate their journeys short of the place to which they have taken tickets, or in the case of return ticket-holders not wishing to return, I am directed to inquire what is the practice in this respect on the Railways in Madras, and to state that, in the opinion of the Government of India, a refund under the circumstances mentioned above is the right course.

No. 315. ORDER THEREON, 12th March 1875, No. 698.

RAILWAY, No. 38.

COMMUNICATED to the Consulting Engineer for Railways, who will obtain the information required by the Government of India.

*Proceedings of the Madras Government, Public Works Department,
12th March 1875.*

No 316 Read the following letter from T MOSS, Esq, Controller of Public Works Accounts, to Colonel G W WALKER, R E, Secretary to Government, Public Works Department, dated Madras, 2nd February 1875, No 9,570 —

I HAVE the honor to request that you will be good enough to inform me whether the figures entered in the two statements printed with the G Os marginally noted are to be taken as representing, after deduction of charges, the actual profit from the Godavery and Kistna anicut schemes.

No 3,219, of 13th November 1874
,, 2,844, of 7th October „

No 317. • ORDER THEREON, 12th March 1875, No. 699

IRRIGATION, No. 22

P W G O, No 2,089, dated 21st Aug 1873,
and „ „ 1,380, „ 22nd May 1874

HIS EXCELLENCY the Governor in Council observes that the Board of Revenue have submitted statements showing for the years 1871-72 and 1872-73—

1st—The whole extent of Irrigation in the several districts of the Presidency and the revenue therefrom derived

2nd—Detailed statements of the Irrigation of the Godavery and Kistna Deltas giving particulars of the acreage and revenue of the irrigated lands under each canal

P W. G O, No 1,592, dated 18th June 1873,
„ „ 3,219, „ 13th Nov 1874,
and „ „ 2,844, „ 7th Oct „

These statements give the Irrigation Revenue of the years to which they refer, but not the profits derived from the Irrigation works

2 The general statements for the Presidency by districts will afford the means, when made complete by the exhibition of the charges of the year including interest on increase of Capital outlay, of indicating the results of their management. They have yet to be prepared for all the years between 1856-57 inclusive and 1871-72, and for at any rate some years prior to the earlier year, in order that the general effect of expenditure may be rendered clear. It will not be necessary to inquire into the Capital expenditure prior to 1856-57 in this connection. The average revenue, less the average maintenance charges for the years prior to 1856-57, will form the net revenue to be taken as the standard of comparison. Then for subsequent years the revenue of each year less the maintenance charge, and minus also the interest on Capital outlay incurred, will be the net revenue to be compared with the standard. For reviewing the general features and circumstances of the irrigation of districts and of the Presidency the arrangements above detailed are believed to be sufficiently complete and accurate. There can be no separation of Land Revenue irrigated into Land Revenue proper and water-rates or assessment. It would practically be impossible to make this distinction, and any attempt to do so would lead to waste of time and an indefinite postponement of the exhibition of those broad facts which are needed by this Government and by the Government of India for the determination of questions relating to the financial value of the Irrigation works of the Presidency.

*Proceedings of the Madras Government, Public Works Department,
12th March 1875*

3 The detailed statements of the Godavery and Kistna Deltas, and the similar statements for all other systems of Irrigation or large individual works for which separate Capital and Revenue Accounts are to be kept, which are under preparation by the Revenue Officers, will give for the year the gross revenue derived from the works. This gross revenue will be reduced to net revenue by the deduction of charges, and there will then be for the particular tracts of country affected—

1st—The gross revenue, charges and net revenue for a series of years prior to the commencement of the extensive improvements, the result of which is to be ascertained and recorded, and the averages will form the standard comparison

2nd—Similar information for the years subsequent to the investment of Capital in improvements
The difference between the average net revenue of the first series of years, and of any subsequent year, will be the profit of that year and between the former and the total net revenue of the second series, the total profit.

The effects of Capital outlay and the return it may have secured in each case will then become apparent, as also the absolute profit after covering the interest on Capital sunk

4 No steps can be taken towards the determination of profit until the standard of comparison in each case shall have been settled, but in the meantime the net revenue of each year can be worked out, as also the Capital expenditure up to the close of each year, and then when the Board of Revenue have prepared and submitted the returns on which the computation of standard net revenue will be made, the results will be readily ascertainable

5 Looking to the great importance of the subject in itself, and to the desire expressed by the Government of India that every endeavour should be made to complete the Capital and Revenue Accounts as soon as possible, the Board of Revenue will be desired to report what steps have been taken in the case of each work or system, for which such accounts are to be kept, to prepare the statements for the series of years from which the standard revenue is to be determined, what progress has been made, and when these statements will be finished and submitted, also when statements, like those furnished for the Godavery and Kistna Deltas for Faslis 1281 and 1282, will be furnished for each of the other works, and, lastly, when the statements for the intermediate years are likely to be ready. The Government consider that it will be necessary to inform the Government of India, as early as may be possible, when the information required will be forthcoming, first for each work in particular, and generally for the whole Presidency.

6. It is observed that only the review by the Chief Engineer for Irrigation of the statements of the Godavery Delta furnished by the Board for Fash 1282 has been printed in Public Works G. O. of the 13th November 1874, No 3,219. The detailed statements will now be printed as an appendix to those Proceedings as they are required for the exhibition of important particulars other than area and water-rates, and in future all such Revenue statements will be embodied in the Proceedings of Government as was done for the Godavery Returns of 1871-72, and those of the Kistna for that year and 1872-73.

*Proceedings of the Madras Government, Public Works Department,
12th March 1875*

7 The Controller will observe that the Revenue statements of the two deltas for the years referred to cannot be finally adopted in the accounts until the explanations called for have been received and disposed of, neither can it be now stated what amount should be taken as the gross revenue of the year for each delta, as it will depend upon the detail in which the returns for the first series of years may be prepared in what way the revenue and profit of recent years will have to be deduced

Office of the Controller of
Public Works Accounts
Madras 2^d February 1875

From

The Controller of
Public Works Accounts

To

The Secretary to Government
Public Works Department
Fort Saint George

Sir,

13219 of 13th November 1874
22014 of 27th October 1874

I have the honor to request that you will be good enough to inform me whether the figures entered in the two statements printed with the G. O. marginally noted are to be taken as representing after deduction of charges, the actual profit from the Godavary and Krishna Ament Schemes.

I have the honor to be,

Sir,

Your most Obedient

Controller of
P.W. Accounts

P. W. D.

Proceedings of the Madras Government,
Under date the 187.

Read the following.—

From the Controller of
Ph Accts } (No. 9570 d/22nd February/75)

699

His Excellency the
Governor in Council observes that
the Board of Revenue have sub-
mitted statements shewing for
the years 1871-72 and 1872-73.
1st The whole extent of Irrigation
in the several Districts of the
Presidency and the Revenue
therefrom derived.

Ph. L.O. No. 2089 d/21st Augt 1873
and — " — 1380 d/22nd May 1874

Ph. L.O. No. 1592 d/18th June 1873
— " — 3219 d/13th Novr 1874
and — " — 2874 d/7th Oct —

2nd Detailed statements of the
Irrigation of the Ryotwary and
Ristow Bittas giving particu-
lars of the acreage and Revenue
of the irrigated lands under
each canal.

Recd. 6 —

No. 9570

Respecting informa-

tion as to certain figures

entered in the statement

of Irrigation in the

Ryotwary and Ristow

Bittas.

No. L.O. 699 d/22-2-75

Revenue proper and water rates
or assessment. It would prac-
tically be impossible to make
this distinction, and any attempt
to do so would lead to waste
of time and an indefinite pro-
longment of the exhibition of
those broad facts which are
needed by this Government
and by the Govt of India
for the determination of questions
relating to the financial value
of the Irrigation works of the
Presidency.

3. The detailed statements
of the Godavery and Krishna
Deltas, and the similar state-
ments for all other systems
of Irrigation or large indivi-
dual works for which separate
Capital and Revenue Accounts
are to be kept, which are under
preparation by the Revenue
Officers, will give for the year
the

the gross Revenue derived from
the works. This gross Revenue
will be reduced to net Revenue
by the deduction of charges, and
there will then be for the
particular tracts of country
affected, as in the case of
1st The gross Revenue, charges
and net Revenue for a series of
years prior to the commencement
of the extensive improvements,
the result of which is taken
ascertained and recorded, and
the averages will form the
standard comparison.
2d Similar information for
the years subsequent to the
commencement of the
improvements, and a comparison
of the difference between the
average net Revenue of the
first series of years and of any
subsequent year, will be the
profit of that year and between
the former and the total
net Revenue of the second series.

Revenue the total profit.
or all the effects of Capital Outlay,
local and the return it may have
the received in each case, will
to do them become apparent, as also
of the the absolute profit after covering
home the interest on Capital sunk.
that No steps can be taken
need towards the determination of
and profit until the standard of
for comparison in each case shall
be settled, but in the
of the mean time the net Revenue of
Price each year can be worked out.
3. as also the Capital Expenditure
of the up to the close of each year,
held and then when the Board of
Revenue have prepared and
of & submitted the returns on
which the computation of
standard net Revenue will
be made, there will be
no ready ascertainable
of

5. and asking rather great
importance of the subject
in itself and to the degree
depressed by the Government of
India that every decision
should be made to complete
the Capital and Revenue Ac-
counts as soon as possible.
The Board of Revenue will be
directed to report what steps
have been taken in the case
of each work or system, for
which such Accounts are to
be kept, to prepare the
Statements for the series of
years from which the standard
Revenue is to be determined.
what progress has been made,
and when these statements
will be finished, and sub-
mitted, also when statements
like those furnished for the
Madras and Rangoon Settlements
for years 1281 and 1282 will
be furnished for each of the
other

other works, and lastly when
the statements for the inter-
mediate years are definitely
forwarded to the Government.
Concluded that it will be necessary
to inform the Government of India
as early as may be possible
when the information required
will be forthcoming, first
for each work in particular
and generally for the whole
Presidency.
It is observed that only
the review by the Chief Engineer
for inspection of the statements
of the Revenue Dettas by the
Board for 1871-72 has been
printed in the 13th of the 13th
November 1871-72. The
detailed statement will have
been printed as an appendix
to the proceedings as they
are required for the exhibition
of important particulars
other

other than area and water rates
and in future all such Revenue
statements will be embodied
in the Proceedings of Govt.
as was done for the Cochrane
Returns of 1871-72, and those
of the Ristia for that year
and 1872-73.

4. The Controller will
observe that the Revenue
statements of the two Dettas
for the years referred to
cannot be finally adopted
in the Accounts until the
explanations called for have
been received and disposed
of, neither can it be now
stated what amount should
be taken as the gross
Revenue of the year for
each Delta, as it will depend
upon the detail in which
the

The Returns for the first
series of years may be
prepared in what way the
Revenue and Profit of recent
years will have to be
deduced
