Memorandum

It is submitted with reference to the remarks of the Honorable Mr. Ellet that the object which the draft order has in view is the better utilization of the funds available under "Repairs Civil Buildings, Postal and Telegraph". There is only a sum of Rs 2500 available for the whole Presidency under each head and these limited grants have to be reorganized to the greatest possible extent.

As the budget at present stands a lump sum of Rs 100 has, as a rule, been assigned to each District. In some Districts the expenditure will be in excess of this amount as in the Bellary District, and an immediate application will as a matter of course be made to the Chief Engineer to supplement the grant - But having no funds at his disposal

disposal he must either negative the demand, or ask Government to make an arbitrary transfer from another District when perhaps the money may be as much required. District Engineers cannot always be depended on to surrender in time funds which they cannot utilize, and it may thus happen that although the total grants for the Presidency under "Repairs, Postal and Telegraph" are small, a portion of the amount may lapse at the end of the year. The draft G.O. is intended to obviate any such result.

It may be added that the proposal will not clash with accounting arrangements.
