Canals were closed.

Total value of the goods, ... with the corresponding month of last year is owing to the reduced estimated value of the goods, ...

* The cause of the large difference in the value of the goods carried this month as compared with the corresponding month of last year is owing to the reduced estimated value of the goods. The decrease in this month's traffic as compared with that shown in January's return may be accounted for by the fact that the Western Delta lead sluices were closed on the 14th January, and also that the Cocanada canal was closed on the 30th February.

† The difference of tonnage between the month of February 1875 and that of February 1874 was owing to the licensees of passenger boats having been accounted for as tonnage. The correct tonnage on passenger boats have been entered in this year.

‡ The falling off in value of goods in Amalapur and East Bank Canals during February 1875 was due to the prices of paddy, coconut, jaggery, and other goods having considerably fallen.

* The cause of the large difference in the value of the goods carried this month as compared with the corresponding month of last year is owing to the reduced estimated value of the goods. The decrease in this month's traffic as compared with that shown in January's return may be accounted for by the fact that the Western Delta head sluices were closed on the 14th January, and also that the Cocanada canal was closed on the 20th February.

† The difference of tonnage between the month of February 1875 and that of February 1874 was owing to the licenses of passenger boats having been accounted for as tonnage. The correct tonnage on passenger boats have been entered in this year.

‡ The falling off in value of goods in Amalapur and East Bank Canals during February 1875 was due to the prices of paddy, coconut, jaggery, and other goods having considerably fallen.
