Public Works DEPARTMENT

G.O. No.	15745	(W)	Press
B.P. No.			Mis.
Dated	23-6	1876	

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
23rd June 1876 No. 1,577.*

No 478 Read the following endorsement of the Chief Secretary to Government,
dated Ootacamund, 19th June 1876, No 916 —
From H S THOMAS, Esq, Collector of Tanjore, to the Hon W HUDLESTON,
Chief Secretary to Government, dated Point Calmère, 12th June 1876,
No 2,153.

With reference to G O, dated 25th March last, No. 569, I have the honor to
report that the plan and estimate originally submitted for extending the compound
wall and converting the hospital shed attached to the Sub-Magistrate's Cutcherry at
Needamungalum into two wards and a room for the use of the Police were intended
to provide sufficient accommodation for the Sub-Magistrate of that station and a station-
house, &c, for the Police. As the Inspector-General of Police was anxious that more
space should be allowed for the proposed station-house and the wards, the revised
plan and estimate to be submitted to Government by the Superintending Engineer
have been framed accordingly.

2 The plan, &c, received with the said Government Order are herewith returned.

TRANSFERRED to the Public Works Department with reference to G O, No 569,
dated 25th March 1876, Judicial. (Signed) W. HUDLESTON,
Chief Secretary.

No. 479. ORDER THEREON, 23rd June 1876, No. 1,577.

CIVIL WORKS, No 59.

RECORDED, pending submission of
revised plan and estimate.

1st July 1899

Specification to accompany Estimate
 for extending compound wall and converting
 the present Hospital attached to the
 Sub Magistrate's Cutchery at Needamangalam
 into a Police Station house and
 two adjoining wards for prisoners.

Amount of Estimate Rupees 850

Alterations

The alterations proposed consist
 of a parapet wall 3 feet high and 18 feet
 in thickness to be constructed in front of the
 existing Hospital, over which will be
 fixed a number of iron bars $\frac{1}{4}$ square
 at intervals of $4\frac{1}{2}$ inches from centre to centre.
 The lower ends of these bars will be let
 into the parapet wall and fixed there
 by means of a beam and a piece of flat
 iron 2 inches in breadth while the upper
 ends will be similarly fastened to the
 pulv which supports the roof of the
 present building. An additional cross
 wall has been provided for converting a
 portion of the existing building into the
 rooms to be used as cells or wards for
 under trial prisoners.

The compound wall will be
 extended agreeably to the section of that

294

that already built.

After the foundations have been dug to the required depth the bottom should be cleared out to a uniform level well watered and tamped and before commencing the work the foundations are to be inspected by the Engineer or Gauge Officer the work may then be proceeded with care being taken that it is correctly laid out after which it should be made to project in layers throughout.

The foundations and Superstructure (brickwork) is to consist of hand and well burnt bricks of the Government size ($9 \times 4 \frac{1}{2} \times 2 \frac{1}{4}$) laid in chunam prepared in proportion of one of lime to two of river sand and great care is to be taken that the water and sand are free from salt. In executing the work English bond is to be maintained throughout and before the bricks are used they should be dipped in water.

Both faces of the compound wall up to the coping at 6' high, are to be neatly pointed the coping will be

Execution of work
Foundations

Brick work
chunam

Plastering and
pointing

be plastered to secure uniformity of appearance with the existing work, all the portions of the work will be plastered and in preparing the chunam the materials must be carefully measured and well mixed together with fresh clean water until it has the appearance of a fine paste previous to laying on the plaster the walls must be rubbed and all joints well raked out.

5 Put of 5 iron barred doors 2, 6' x 4' and 3, 7' x 4' as per plan to be provided and put in positions shown in plan, the frames to be $1 \frac{1}{2} \times 4 \frac{1}{2}$ to be made up of the best teakwood obtainable and provided with iron bars ($\frac{3}{4}$ " round) English hinges, bolts, locks complete. The bars to be fixed 4 inches apart clear space between bars the outer bars will be $2 \frac{1}{2}$ " from wooden frame.

6 One iron barred window $1 \frac{1}{2} \times 3$ to be removed from H and to be placed at C. a door being placed at H.

7 The small circular ventilator already put up in the hospital are to be removed and replaced by large

larger ones measuring 5x2 and 4x2 res-
 pectively all of which are to be put
 up in positions shown in plan and
 they will be made up of the best
 material procurable as specified for
 the doors. The ventilators in the rear and end
 walls to be provided with teakwood weather-
 boards.
