*Proceedings of the Madras Government, Public Works Department,
21st August 1876. No 2,198.*

Read the following papers —

No. 478. Proceedings of the Madras Government in the Judicial Department,
dated 4th May 1876, No. 840.

ABSTRACT — *Taluq Cutcheries* — The construction of a latrine in the compound
of the Cutcherry at Conjeveram at a cost of Rupees 275, sanctioned.

No. 478-A. From Colonel F. J. MOBERLY, R.E, Superintending Engineer,
Chingleput, to Lieut-Colonel W. FAREWELL, Deputy Chief Engineer,
Public Works Department, dated Camp at Ramanjery, 8th August 1876,
No. 1,657.

WITH reference to your memorandum, No T/260, dated 18th May 1876, I have
the honor to forward a revised estimate and plan, amounting to Rupees 500, for
constructing a latrine within the compound of the Taluq Cutcherry at Conjeveram,
prepared in accordance with the standard plan for public latrines attached to
Cutcheries.

2. The plan and estimate have been approved by the Collector of the district.

No. 479. ORDER THEREON, 21st August 1876, No. 2,198.

CIVIL WORKS, No 40.

(a) *Heads of Service* — Provincial.
Fund — Ordinary
Class — Original Works
Main-head — Civil Buildings
Sub-head — B, Revenue Department.
Section — II, Taluq Cutcheries
Name of Work — Latrine in the compound of the Taluq
Cutcherry at Conjeveram
Amount — Rupees 500
To be carried out by the Public Works Department

THE estimate of Rupees 500, for
constructing a latrine within the com-
pound of the Taluq Cutcherry at
Conjeveram, is sanctioned. No funds
are available.

2. This sanction has been regis-
tered as Provincial No. 121 W. of
1876-77.

Specification report to accompany Estimate
for Constructing a Public Latrine for the
Caucasian Salty Lutcherry

The latrine is designed to accommodate
6 persons at a time, that is 3 at each side.
The extreme length of the building is 27 feet
and breadth 13 feet.

All masonry to be of the best material
available, the Engineer to have at all times the
power of rejecting material, either collected or
built, that does not in his opinion answer the
above description.

Brick masonry — This work is to be performed according
to the Estimate, no deviation therefore will be
recognized unless made under written order
signed by the Engineer; the bricks to be well burnt
and well shaped and the joints between them
as small as possible and filled with good mortar,
the bond throughout to be perfect.

Flue and tilework — The tiles are to be 9 inches long
soaked previously in white wash, dried
in the sun and then laid in rows with their
joints inclined, the joints will be set in strong
mortar and neatly ruled down.

Wood work — The teak for Brassmeyer's trap-
doors to be of good seasoned wood and free
from

from cracks & flaws—

Flanking—To be of brick jelly or concrete, consisting of 5 parts of hard brick broken small, 1 part soky, and 1 part fresh lime put down in three layers and each layer well rammed, until the whole mass becomes quite solid.—

Asphalte—After the concrete hardens and is free from moisture, a coating of asphalte to be put on $\frac{1}{4}$ inch thick the composition parts of the asphalte for each square to consist of—

- 33 $\frac{1}{2}$ lbs asphalt.
- 2 $\frac{1}{4}$ parts clean sharp river sand
- 15. Pullams gungelly oil.

Roofing—To consist of first class palm-leaf tanned, placed $1\frac{1}{2}$ feet apart from centre to centre, teak wood rafters $2\frac{1}{2} \times 3\frac{1}{4}$, 6 inches apart from centre to centre, flat tiles, pan tiles, and Chumam boards 12 inches wide and 3 ft apart from centre to centre.—

Plastering—To be of the best materials as under viz—

First Coat—1 part, clean river sand, $\frac{1}{2}$ part thoroughly mixed, beaten up and applied to the wall after packing out all joints $\frac{1}{4}$ inch deep and wetting the surface of the wall to assist cohesion—

Second Coat—3 parts of fresh

and one of white sand ground on a stone and applied over the first coat with care rubbed down perfectly smooth and finally polished with pure lime soap stone.

The surface to be wiped whenever moisture appears.—
