to the office originally held
by him with a promise that
his advancement would
depend on his future conduct,
appears to be to pass a lenient
punishment upon memorialists,
that he has already been out
of employ for the space of 21
months; that it would be
sometime before he could
get a place; that his suffer-
ings are great; that from
the order of October 1875 it
is evident that Govt did
not intend that his pay
should be forfeited and
that the District Engineer's
order on his application
for a post is vague. Under
these circumstances requests
that Government will be
pleased to issue definite
instructions on the subject
of his reemployment and

order payment of arrears
of salary.
