Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
17th October 1876. No. 2,777.*

No. 248. Read the following endorsement of the Chief Engineer for Irrigation, dated 2nd October 1876, No. 214 W :—

From Major J. VERTUE, R.E., District Engineer, Trichinopoly, to Lieutenant-Colonel J. MULLINS, R.E., Chief Engineer for Irrigation, dated Trichinopoly, 30th August 1876, No. 482.

I HAVE the honor to forward a list of the Conservancy Establishment of this district paid by the Public Works Department and sanctioned annually in the Budget, and to request that I may be permitted to make the following change in the personnel, viz., substitute four boys at 3 and ten boys at 2-8-0 Rupees for one Monigar at 7 and six at 5 Rupees per mensem. I have long been of opinion that these men are quite useless, and I find Range Officers think the same. They run out when the District Engineer or Range Officers are coming; at other times they spend their time in Trichinopoly or the nearest large village, and as a large part of the work done by the establishment, as, for instance, the pounding of cattle, requires no superintendence, and cannot be checked, the services of these men in the light of superintendents are quite unnecessary. There is plenty of work to be done, work that cannot well be done on estimate, but which is of great importance in the conservancy of the embankments and padugays, but for this are required people who will use their hands, and what with the District Engineer, Range Officers, Overseers and Sub-Overseers there is plenty of superintendence. Boys, it is well known, when work is not beyond their strength, do more work than men, and they are not up to the bad practices and tricks of the latter. The change I have proposed would add most materially to the working power and efficiency of the establishment, and I have therefore the honor to recommend it most strongly.

SUBMITTED for the consideration of Government with a recommendation that the proposals of the District Engineer, Trichinopoly, for a re-arrangement of the Conservancy Establishment in that district may be sanctioned. The changes will involve no additional expense.

2. The prescribed tabular statement is enclosed.

(Signed) JOHN MULLINS, Lt.-Col., R.E.,
Chief Engineer for Irrigation.

No. 249. ORDER THEREON, 17th October 1876, No. 2,777.

IRRIGATION, No. 31-A.

Establishment.

THE re-arrangement of the Conservancy Establishment of the Trichinopoly District is approved and the sanction of the Government of India

to the new scale shown in the tabular statement will be asked for.
