Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
7th February 1876.*

No. 97. Read the following letter from Major H. R. MEAD, R.E., District Engineer, South Arcot, to Major-General G. W. WALKER, R.E., Chief Engineer, Public Works Department, dated Camp at Pooniar Anicut, 20th January 1876, No. 192 :—

As requested in your memorandum No. 98, dated 17th January 1876, I have the honor to report that I propose Mr. Bird should take levels from Cuddalore up the road to Punrootti so that we may know the heights of the three anicuts, across the Guddelum river, above mean sea level and the fall of the country. From Trivady Anicut, the upper one, I propose he should level across to the Pooniar and connect his levels with those taken down that river by Mr. Garrett. As soon as this is done, I should wish five or six cross lines of levels to be taken from the Guddelum to the Pooniar rivers.

2. I have ordered Mr. Maclean to join No. III. Range, and directed that he is to level down the Pelandoray channel, taking cross sections of it to enable an estimate for clearing it to be prepared, and when this is done I propose he shall take a line of levels up the Vellaur river to the anicuts and connect them with the mean sea level.

3. These lines of levels are greatly required in the district, and I do not think a young Assistant Engineer can begin better than by learning practical levelling. As soon as they have completed these levels, I propose putting them in the preparation of small irrigation projects. While at this work I will see that they have opportunity of inspecting works in progress.

4. The levels may be considered as irrigation.

No. 98. ORDER THEREON, 7th February 1876, No. 330.

IRRIGATION, No. 8A.

Establishment.

THE District Engineer is authorized to engage two temporary lascars for each of the Assistant Engineers from Cooper's Hill College.

2. Additional lascars for survey work, chargeable to the grant for survey establishment, may also be entertained.

Enclosures.

Sir,

As requested in your Memo. No. 78 dated 17th January 1876, I have the honor to report that I propose Mr. Bird should take levels from Guddalore up the Road to Punsavalli so that we may know the lengths of the 3 canals, across the Guddalore river, above mean sea level and the fall of the Country. From Trivady canal, the upper one, I propose he should level across to the Poniam and connect his levels with those taken down that river by Mr. Garrett. As soon as this is done, I should wish 5 or 6 cross lines of levels to be taken from the Guddalore to the Poniam rivers.

2. I have ordered Mr. Madhane to join to III Range and directed that
