*Proceedings of the Madras Government, Public Works Department,
17th February 1876.*

No. 313. Read the following Memorandum from the Chief Engineer for Irrigation, to the Secretary to Government, Public Works Department, dated Camp at Vullur, 9th February 1876, No. 172:—

In paragraph 3 of the letter from the Collector of South Arcot, communicated with G.O., No. 20, of the 4th January 1875, it is suggested that a certain plot of ground above the flood bank at the north end of the Ponnai anicut should be planted up with nanel or other vegetation. It will be seen on referring to paragraph 6 of the memorandum, No. 195-A., of the 16th February 1875, printed in Proceedings, Madras Government, No. 2,020, of the 16th July 1875, which were communicated to the Revenue Department, that the arrangement noticed as desirable was intended to be carried out, and it is hoped that ere this much of this extended plantation has been established.

2. It is not always practicable to prepare bricks and tiles departmentally, though this can usually be done when the works for which such materials are required are of magnitude. When Range Officers are capable of making good bricks themselves and of determining their proper price, it is not difficult for them to obtain from Contractors what is required. Under the conditions mentioned, excellent bricks have in some districts superseded the inferior kinds entirely.

(Signed) JOHN MULLINS, Lieut.-Col., R.E.,
Chief Engineer for Irrigation.

No. 314. ORDER THEREON, 17th February 1876, No. 437.

IRRIGATION, No. 34.

N^o 172Memorandum

In para 3 of the letter from the Collector of South Arcot, communicated with Government Order N^o 20 of the 4th January 1875, it is suggested that a certain plot of ground above the flood bank at the North end of the Ponnaiy Annicut should be planted up with Nanel or other vegetation. It will be seen on referring to para 6 of the memorandum N^o 195 A of the 16th February 1875, printed in Pros: Madras Government N^o 2020 of the 16th July 1875, which was communicated to the Revenue Department that the arrangement noticed as desirable was intended to be carried out, and it is hoped that ere this much of this extended plantation has been established.

2. It is not always practicable to ^{Collector's para} prepare bricks and tiles Departmentally, though this can usually be done when the works for which such materials are required are of magnitude. When Range Officers are capable of making good bricks themselves and of determining their proper price, it is not difficult for them to obtain from Contractors what is required. Under the conditions mentioned, excellent bricks have in some Districts superseded the inferior kinds entirely.
