G.O. No.	513	(2)	Press
B.P. No.			Mis.
Dated	25-2		1876.

Not to be folded or roughly handled

*Proceedings of the Madras Government, Public Works Department,
25th February 1876.*

Read the following:—

No. 208.

No. 462.

Note by the Chief Engineer for Irrigation.

In G.O., No. 1,588, of the 2nd July 1870, it was directed that an estimate, amounting to Rupees 6,530, for cutting a new head from the Auliar for the Area-poorum channel in the Coimbatore District should be returned to the Superintending Engineer for reconsideration.

2. Subsequent correspondence has led to the conclusion that the chief want of the channel is the means of disposing of the drainage brought into it by the Periacambo stream which drains an area of $4\frac{1}{2}$ square miles, and the Superintending Engineer has transmitted an estimate of Rupees 1,800 for constructing a surplus weir with three under sluices, which will be capable of discharging the drainage and of passing through the vents the sand and silt brought down by this stream.

3. The heading of the estimate has been revised in accordance with the rules now in force, and the work should be charged to Capital and will be carried out from the district grant for Minor New Works.

FORT ST. GEORGE,
16th February 1876.

(Signed)

A. DEC. SCOTT, Major, R.E.,
for *Chief Engineer for Irrigation.*

No. 463.

ORDER THEREON, 25th February 1876, No. 513.

IRRIGATION, No. 49.
Account.

THE estimate of Rupees 1,800 for constructing a surplus weir for the Area-poorum channel in the Coimbatore District is sanctioned for execution from the district

grant for Minor New Works and will be chargeable to Irrigation, Capital, Ordinary, Original Works.

2. This sanction has been registered as No. 13 I. of 1875-76.

(True Extract.)

(Signed) G. W. WALKER, Major-General, R.E.,
Secretary to Government.

Note by the Chief Engineer for Irrigation

Dr. P. O. No. 1588 of the 2nd July 1879,
it was directed that an estimate amounting
to Rupees 6,550 for cutting a new head from
the Anlier for the Poodperram channel in
the Coimbatore District should be returned
to the Superintending Engineer for consideration.

Subsequent correspondence has led
to the conclusion that the chief want of the
Channel is the means of disposing of the
drainage brought into it by the Poodperram
Stream which drains an area of $4\frac{1}{2}$ square
miles, and the Superintending Engineer has
transmitted an estimate of Rupees 1800 for
constructing a surplus weir with 3 under-
sluices, which will be capable of dis-
charging the drainage and of passing
through the vents the sand and silt is
brought down by this stream.

3. The heading of the estimate has been re-
vised in accordance with the rules now in
force, and the work should be carried out
from the District Grant for Minor Works.
