Revenue	...	...	...	7,89,881
Total ...				<u>1,01,48,188</u>

SIR,—I am directed by the Governor in Council to forward the accompanying statement which has been furnished by the Accountant-General, showing the sums received and disbursed on account of the Madras Irrigation and Canal Company for the month of February 1877. The aggregate amount expended up to 28th February was Rupees 1,01,48,188.

I have the honor to be,

Sir,

Your most obedient servant,

Lieut.-Col., R.E.,
Joint Secy. to Govt., P.W.D.,
Irrigation Branch.

The dwelling or
 suggested is far off evidently
 In the mean time the
 land must live. &
 the suggested plan of
 House all over. although
 it might not be objectionable
 for some of the old men
 would be destruction of
 discipline with all. The
 young especially who
 are now kept under the
 eye & control of the sergeant
 I should say Thomas say out
 Monday Dec^r. as the
 lot is not much value.

Since you are not
 permitted to see the
 things in the museum
 and the collection is
 so large it is not
 possible to see it all
 in one day. It is
 necessary to see it
 in stages. The first
 part is the collection
 of the birds. The
 second part is the
 collection of the
 mammals. The third
 part is the collection
 of the reptiles and
 amphibians. The fourth
 part is the collection
 of the insects. The
 fifth part is the
 collection of the
 minerals. The sixth
 part is the collection
 of the plants. The
 seventh part is the
 collection of the
 fossils. The eighth
 part is the collection
 of the geological
 specimens. The ninth
 part is the collection
 of the astronomical
 specimens. The tenth
 part is the collection
 of the ethnological
 specimens. The eleventh
 part is the collection
 of the historical
 specimens. The twelfth
 part is the collection
 of the literary
 specimens. The thirteenth
 part is the collection
 of the musical
 specimens. The fourteenth
 part is the collection
 of the artistic
 specimens. The fifteenth
 part is the collection
 of the scientific
 specimens. The sixteenth
 part is the collection
 of the medical
 specimens. The seventeenth
 part is the collection
 of the legal
 specimens. The eighteenth
 part is the collection
 of the religious
 specimens. The nineteenth
 part is the collection
 of the philosophical
 specimens. The twentieth
 part is the collection
 of the historical
 specimens.

of utilizing the space
 of the vicinity of any
 the waste material -
 much known of which
 will probably be needed
 on the spot should be
 well considered - and the
 leading committee of
 financial arrangements
 permit it to be so - on a
 systematic plan - putting
 in each case the part
 taken in hand -

As regards accommodation
 for bird or other display
 & removal of material that
 must also be considered -

I doubt the expediency
 of any further accumulations
 being recorded in a book
 the fact - with care
 sufficient to be a

entirely disarranged
with the sewage &
crowded across the
ditch at such a level
as will not be health
gave the outlet
choked & said -
it should be an healthy
and comfortable
station - and in removal
of General - with
ample room for
hospital accommodation
etc - that should be
strictly limited to
those whose residence
within is essential -

B. C. 16/12

I retained these papers
with the intention of going
over every portion of the
but-unto accompanied by
Major Robert. B. S. - that
intention has frustrated by
my falling ill -

But although I remain not
able to do as I wished, I have
been through most of the papers,
and am able to form an
opinion as to their general
condition -

General Walker is quite right
in stating that his long opinions
they had better be removed -
in their present state they are
useless as justifications to resist
modern artillery; and I believe
it would cost more money to
print them up so as to render
them fit for anything than it
would to remove them & erect
new works.

As far as defensive purposes
goes from attacks by the sea,
I consider that the present
demanded of our authorities
would suffice - whilst to
place the Fort in a position

to do anything more than
this is, I presume, not to be
entertained -

The objection to employing
female labour in the demolition
was the fear of bringing cholera
& disease into the Fort amongst
the British troops - So here any
early result, large numbers of
workers would have to be employed;
& though they might be kept well
off the Fort, all intercourse with the
interior would have to be by passing
through these masses of people -

Whilst the demolition of
the Fort is in contemplation
it seems to me useless to enter
upon the consideration of some of them
into accommodations for the Band.
I think it would be better to give
the men leave and let them
find themselves -

Shortly after the outbreak here
last year I think it would then
be time to consider whether the
open space should be interfered
with - or what had best be
done - The question of sea
defences has yet to be thought
about.
