No. 230.

MEMORANDUM.

THE following authorizations to the Superintending Engineer, Godavery, to proceed with emergent work in connection with the Godavery anicut in anticipation of the provision of funds are reported for the information of Government, the rules as to allotments and appropriations having been set aside.

(1.)—Restoring apron below Dowlaishwaram under sluices, which has been washed away during the last freshes—
 Memorandum, No. 13-G.D., dated 19th instant. estimate Rupees 11,000.

Do., No. 14-G.D., dated 19th do. (2.)—Protective works above the Dowlaishwaram branch of the anicut—estimate Rupees 8,400.

Do., No. 15-G.D., dated 19th do. (3.)—Protective works at hole below Muddur branch of anicut—estimate Rupees 11,000.

2. The instructions sent in reply to the Superintending Engineer's letters prescribe modifications of the proposed arrangements which will, in each case, reduce expenditure, and the Superintending Engineer has been instructed to report the amounts of the revised estimates as soon as possible. It appears probable however that an allotment of at least Rupees 25,000 will be required, and the following transfers are recommended to allow of the rules being conformed to:—

FROM ORDINARY AGRICULTURAL—REPAIRS. To REVENUE—MAINTENANCE AND REPAIRS.

			RS.				RS.
<i>Cuddapah District.</i>							
Irrigation Works	...	...	10,000	Godavery Delta System	...	...	25,000
River Conservancy	...	...	10,000				
<i>South Arcot District.</i>							
Irrigation Works	...	...	5,000				
			25,000				25,000

3. More or less expenditure on protective works, in connection with the Godavery Anicut, is necessary annually. The nature and extent of such work cannot be ascertained until after the cessation of the freshes, and then there is no time to spare in carrying it out. It has been pointed out to the Superintending Engineer that it is his duty to reserve from the Repair grant enough money to meet both ordinary expenditure on this account, and also to provide a margin for any extra work which may be found necessary.

FORT ST. GEORGE,
 19th January 1877.

(Signed) JOHN MULLINS, Lieut.-Col., R.E.,
Chief Engineer for Irrigation.
