Specification Report. 52

An estimate (amounting to \$12,300) was sanctioned in G. O. No. 1416 dated 7th June 1876 for converting the terraced roof of the Jailors Quarters into a tiled roof. It was proposed to let the terraced roof of the porch and guard room remain.

This would give the building a ridiculous appearance, and would be a source of constant leakage at the point where the two different roofs meet.

The Superintendent of the Jail is exceedingly averse to this being done. Moreover the roof of the Porch and guard room are in as bad a state as that of the Jailors Quarters - The ends of the girders are rotting away and the roof is leaky. The quality of the timber used is not suitable for roofs of this description.

This estimate therefore provides for converting the entire roof into a tiled one.

The roof of the Veranda (at Jailors quarters & guard room) which is terraced also, will be removed and a tiled roof substituted as the in keeping with the main building of the present roof is very leaky.
