Not to be folded or roughly handled

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

3rd August 1877, No. 527 W.

Buildings and Roads.

Civil Works.

Read the following paper :—

No. 26. From Major ROSS THOMPSON, R.E., District Engineer, Presidency, to the Chief Engineer, Public Works Department, Buildings and Roads, dated Fort St. George, 21st July 1877, No. 2,264.

With reference to the orders of Government as per margin, I have the honor to submit, for sanction of Government, a plan, specification report, and estimate, amounting to Rupees 1,310, for laying a pipe from the General Hospital to supply Seven Wells water to the Penitentiary.

2. The original letter from Lieutenant Baddeley, R.E., reporting how the Seven Wells water could be supplied to the Penitentiary is also herewith submitted.

From Lieutenant W. L. C. BADDELEY, R.E., Assistant Engineer, Southern Range, to Major ROSS THOMPSON, R.E., District Engineer, Presidency, dated Fort St. George, 17th July 1877, No. 65.

With reference to your No. 1,262, of 1st June 1877, I have the honor to submit a plan, estimate, and specification showing how Seven Wells water could be supplied to the Penitentiary, and, at the same time, I have the honor to report as follows :—

1. The whole length of piping which conducted Seven Wells water to the Penitentiary cistern has been removed and utilized upon other works as follows :—1,100 feet for the Pier water-supply and 100 feet upon minor works (blow off pipe General Hospital).

2. The Red Hills water pipe runs to the same cistern, and therefore as it is not probable that there will ever be any necessity for supplying the cistern simultaneously with water from the Red Hills and Seven Wells, I would suggest that a connecting pipe should be fixed as shown in the plan, by which only one pipe would reach the cistern as at present, and yet Red Hills or Seven Wells water could be turned on as desired.

3. The amount of the estimate for the connecting pipe is Rupees 1,310, whilst to replace the whole length of piping up to the Penitentiary would cost approximately Rupees 2,600.

4. As the railway is directly across the line to the Penitentiary, this would appear to be an additional reason for utilizing the existing pipe in lieu of laying down the original line.

No. 27.

ORDER THEREON, 3rd August 1877, No. 527 W.

The plan and estimate of Rupees 1,310 for relaying the Seven Wells water pipe from the General Hospital to the Penitentiary are sanctioned, the work being debited to the savings reported on the widening of the hospital bridge partly attributable to the omission of the relaying of the pipes in question.

2. The District Engineer will lose no time in carrying out the work. The requisite funds are appropriated from the Provincial Reserve.

2. Estimate

1. Specification

With reference to your No. 1262 of 1st June 1877 I have the honor to submit a plan, Estimate & Specification showing how seven Wells water could be supplied to the Penitentiary, and at the same time I have the honor to report as follows.

1. The whole length of piping which conducted Seven Wells water to the Penitentiary Cistern has been removed and utilized upon other works, as follows: 1100 feet for the Pier water supply, and 100 feet upon minor works (Blow off pipe Gen. Hosp.).
2. The Red Wells water pipe runs to the same Cistern, and therefore, as it is not probable that there will ever be any necessity for supplying the cistern simultaneously with water from the Red Wells & Seven wells, I would suggest that a connecting pipe should be fixed as shown in the plan, by which only one pipe would reach the cistern as at present, and yet Red Wells' or seven wells' water could be turned on as desired.

3.
3
The amount of the Estimate for the connecting pipe is Rs 1310 whilst to replace the whole length of piping up to the Penitentiary would cost approximately Rs 2600
4. As the Railway is directly across the line to the Penitentiary, this would appear to be an additional reason for utilizing the existing pipe in lieu of laying down the original line.
