*Proceedings of the Madras Government, Public Works Department,
8th January 1877. No. 66.*

Read the following :—

No. 9 W.

No. 123. *Note by the Chief Engineer for Irrigation.*

THE District Engineer, North Arcot, forwards, with his letter marginally noted, an estimate in connection with the river supply channel of the Cheroovenkey Tank, situated in the Goodiantum Taluq, No. 2 or Chittoor Range.

2. The nature of the work proposed for execution and the heads of account to which it is chargeable are as follow :—

ORDINARY AGRICULTURAL.

Original Works.

	RS.
Constructing a sluice at head of supply channel	675
Improving the surplus weir of do.	380
New stone revetment for channel banks, &c.	1,615

Repairs.

Rebuilding the head retaining wall	910
Repairing the supply channel	2,280

Total ... 5,860

3. The following particulars of this tank are recorded :—

Ayacut area	Cawnies 483
Assessment	Rupees 4,202
Average Revenue	" 4,000
Highest do.	Not stated.
Expenditure during the previous four years	Nil.

This is the main supply channel of the Cheroovenkey tank, and it is an offtake of the Goodiantum river. The entire length of the channel, which is about a mile and a half long, is to be repaired.

The retaining wall at the head of the supply channel as well as the channel itself has been almost destroyed by the high floods of last year. The tank is now entirely deprived of its supply from the river, and a regulating work at the head of the channel is much needed for the safety of the tank.

4. Certain details of the head sluice have been revised in reference to a note of remarks from this office. It is understood also that an embankment has been provided 3 feet above the highest flood level, and so directed as to prevent the sluice from being turned.

The estimate is now recommended for sanction.

(Signed) A. DEC. SCOTT, Major, R.E.,

3rd January 1877.

*Dy. Chief Engineer for Irrigation,
for Chief Engineer for Irrigation.*
