*Proceedings of the Madras Government, Public Works Department,
10th January 1877. No. 85.*

No. 160. Read the following letter from W. B. LEGGATT, Esq., A.I.C.E., Officiating District Engineer, Bellary, to Major-General G. W. WALKER, R.E., Secretary to Government, Public Works Department, dated Bellary, 26th December 1876, No. 4,053 :—

I HAVE the honor to request that eight more Overseers may be sent to this district for employment in the supervision of Famine Relief Works.

2. Temporary establishment in the Lower Subordinate grade has, under the authority conveyed in your memorandum No. 1,526, dated — October 1876, been entertained as per margin, but the staff of Upper Subordinates in this district is found to be wholly inadequate for the efficient supervision of the numerous relief works that are in progress throughout the district.

3. The Executive Engineer in charge of the Ghooty Range reports that three additional Overseers are urgently required for that range, he states that about 15,000 coolies are now working on the roads alone in one taluq in his range; that the number is daily increasing; that his other taluqs are just as badly situated, and that he finds it almost impossible to have the works satisfactorily carried out.

4. All the other ranges are likewise in urgent need of more hands, and I beg that early orders may be passed on this matter.

No. 161. ORDER THEREON, 10th January 1877, No. 85.

ESTABLISHMENT, No. 11.

THE necessities of other districts will prevent any further detachment from them out of the number of Overseers on their permanent establishments. The District Engineer of Bellary will apply to the Collector for the aid of some men of the Overseer class from those placed at his disposal by the Survey Department, if any can be spared.

(True Extract.)
