GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

16th March 1878, No. 1,354 W.

General
Establishment.

Read the following paper:—

No. 204. Endorsement of the Chief Engineer for Irrigation, dated Fort St. George, 5th March 1878, No. 13 C.I.

From Captain A. AWDRY, R.E., Acting District Engineer, Coimbatore, to the Chief Engineer for Irrigation, dated Coimbatore, 22nd February 1878, No. 226 C.I.

I HAVE the honor to forward a disallowance list from the Examiner for travelling allowance to the two Sub-Overseers (originally called Irrigation Maistries*) in the Caroor Range.

2. In the pressure of the need for subordinates who knew the range and could be trusted, these men have been employed like others on famine-relief works and been obliged to travel about; they have done their work, which necessitated the keeping up of ponies, very well, and I have the honor to request that the travelling allowances may be passed and charged to Famine if it cannot be otherwise charged.

3. While writing about these Sub-Overseers' allowances, I have the honor to suggest that they may in ordinary times be also permitted to draw the travelling allowances sanctioned by the code for other Sub-Overseers, as they have to move about from one irrigation work to another, and their efficiency is considerably impaired by not being able to move quickly.

4. There is an Irrigation Maistry on the Ambravatti Channels of the Udumala-pettah Taluq, who also would be of more use if he had allowances with which to keep up a pony.

TRANSFERRED to the Chief Engineer, Public Works Department, for disposal.

The undersigned sees no objection to the grant of horse allowance to the Irrigation Maistries of the Coimbatore District while employed on duties connected with famine-relief works, but he is opposed to the grant of this allowance to men of this class generally, as their ordinary duties should not entail more moving about than they can easily get through on foot. They are not appointed for general duties, but for particular work which lies within moderately distant limits, and it is more probable that this work will be properly done if their attention be strictly confined to it. Paragraph 3 of G.O., 10th June 1868, No. 1,829, should therefore continue in force.

(Signed) JOHN MULLINS, Lt.-Col., R.E.
Chief Engineer for Irrigation.
