GOVERNMENT OF MADRAS.  
PUBLIC WORKS DEPARTMENT.

26th March 1878, No. 1,532 W.

General.

Account.

Read the following papers:—

No. 381. From J. D. GRANT, Esq., Officiating District Engineer, Tinnevely, to the Chief Engineer, Public Works Department, dated Palamecottah, 2nd November 1877, No. 115.

I HAVE the honor to request permission to recover from 2nd Grade Taluq Overseer P. Ruthnasawmy Moodelly Rupees 11-1-0, being the value of a Government clinometer lost by him.

No. 381-A. From the same Officer, dated Palamecottah, 2nd November 1877, No. 117.

I HAVE the honor to request permission to recover from Cannadian Channel Head Sluice Head Lascar Sudalaswaren Rupees 4, being the value of rain gauge measuring glass broken by him.

From J. D. GRANT, Esq., Officiating District Engineer, Tinnevely, to the Chief Engineer, Public Works Department, through the Examiner of Public Works Accounts, dated Palamecottah, 11th March 1878, No. 212.

REFERRING to your Memorandum, No. 3,771, of 8th November 1877, I have the honor to report that though I cannot produce evidence to prove gross carelessness on the part of the Cannadian Head Sluice Lascar from whom I wished to recover the value of a rain gauge glass broken when in his charge, yet from what I have ascertained I am of opinion that he should be held responsible.

2. The rain gauge is in his charge and he has a hut in which to keep the glass and other stores, and it appears that, owing to his becoming involved in a quarrel with some persons in a neighbouring village, a fight ensued at the head sluice and the glass was broken.

3. In the case of the clinometer lost by P. Ruthnasawmy Moodelly, Taluq Overseer, the evidence is very confused, but this much is certain that the clinometer which was at one time in his charge is not forthcoming, and as he cannot satisfactorily explain its loss, I concluded that he should be held responsible for it and recommended the recovery of its value from him.

No. 381-B. From the Examiner of Public Works Accounts, dated Chepauk, 16th March 1878.

2 PUBLIC WORKS DEPARTMENT, 26TH MARCH 1878, No. 1,532 W.

No. 382. ORDER THEREON, 26th March 1878, No. 1,532 W.

THE value of the clinometer will, as recommended by the District Engineer, be recovered from the Overseer. The lascar should be warned of the responsibility devolving upon him, and that should articles in his charge again be damaged or lost their value will be recovered from him.

1878  
From J. D. Grant Esquire  
Off: Dist Engr Tinnevely

To.

Colonel E. A. Ford R.R.  
Chief Engineer. D. P. W.

Sir,

Referring to your Memo No  
3771 of 28 November 1877. I have the  
honor to report that though I  
cannot produce evidence to prove  
gross carelessness on the part of the  
Canadian Head Slave Lascar  
from whom I wished to recover the  
value of a rain gauge glass  
broken when in his charge, yet  
from what I have ascertained,  
I am of opinion that he should be  
held responsible.

2. The rain gauge is in his charge  
and he has a hut in which to  
keep the glass and other stores and  
it appears that owing to his  
becoming involved in a quarrel  
with some persons in a neighbouring

village, a fight ensued at the head  
shrine and the glass was broken.

3. In the case of the Clinometer  
lost by P. Rasthiasamy on 26th  
July 1900, the evidence is  
very confused, but this much is  
certain that the Clinometer  
which was at one time in his  
charge is not forthcoming, &  
as he cannot satisfactorily  
explain its loss, I concluded that  
he should be held responsible  
for it and recommended the  
recovery of its value from him.

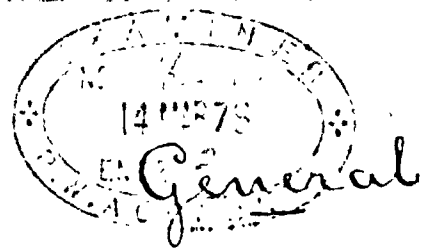

I have the honor to be  
Sir

Yours most obedt servt
