I have the honor to state
that the following alterations are
required in the hospital buildings
The Cookroom accommodation
of the Hospital is very defective. It is
very small 110 square feet a great
part of which is taken up by the
raised hearth and table there is no
room in it for its proper furniture
and no verandah to supplement the
defective space or for cleaning oper-
ations. It is dark and smoky. I
beg to request the following alterations
A verandah in front with ground
floor, the drain which now skirts
the Cook-house and is badly arranged
as to level to be diverted along the
edge of the verandah.
A second large window is also
required.

2 I also beg to draw attention to a beam across the main stair case of the hospital. It is just 6 feet from the stair below so that a tall person or one wearing a high pump considers the risk when ascending in ignorance of the danger. I believe that 3 or 4 inches might be taken off this beam without materially affecting its effective strength.

3 The railing of the upper story in the Female Hospital is dangerous between the bars and the ground the only obstacle to children is afforded by cross or diagonal bars. Perpendicular railings are preferred. Apparently mean to prevent children creeping through.
