No. 272. MEMORANDUM.

IN G.O., No. 1,031 B, dated 21st April 1874, the whole of the valuable machinery and plant then on the premises which had been used in the construction of the Lawrence Asylum at Lovedale were handed over to the Lawrence Asylum Committee for utilization in the Workshops. The Chief Engineer when lately inspecting the buildings observed much of the valuable machinery in question laying unused and apparently uncared for, exposed in the open air in the vicinity of the buildings, and thus must be rapidly deteriorating in value. The Chief Engineer, therefore, suggests that the Lawrence Asylum Committee be called upon to return to the District Engineer, Nilgiris, the whole of the steam engines, &c., &c., which are not being utilized at the Lawrence Asylum. The District Engineer, Nilgiris, should submit an estimate of the cost of removing the articles to his own work-yard at Ootacamund where they can be put into working condition and utilized when wanted.
