GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

5th June 1878, No. 2,387 W.

Buildings and Roads.
Military Works.

Read the following paper:—

No. 30. Endorsement of the Secretary to Government, Military Department, dated Ootacamund, 8th May 1878, No. 2,271.

From Colonel R. CADELL, C.B., Inspector-General of Ordnance and Magazines, to the Secretary to Government, Military Department, dated 4th May 1878, No. G—48.

With reference to Order of Government, No. 1,713 W, dated 4th April 1878, "Referred to the Inspector-General of Ordnance and Magazines for the required information. Public Works Department, received under cover of your No. 1,918,* dated 17th idem, I have the honor to state for the information of Government that the Superintendent, Gun Carriage Factory, has reported that "there is no record of any article in course of manufacture ever having been damaged by the want of the covering applied for to the space between the 30 cwt. and 15 cwt. steam hammers; of course every precaution is taken to prevent any possible damage.

"Neither has work ever been stopped on account of ordinary rain (it was stopped last year for two days during the heavy rain of May), but work would possibly be delayed in the taking of the precautions referred to above, that is to say work would not go on so freely.

"The chief object of the covering, however, is to protect the work-people who while exposed to the intense heat engendered by the furnace and boiler are also liable to get wet from the falling rain."

2. Concurring in the views of the Superintendent.

TRANSFERRED to the Public Works Department.

(By Order.)

(Signed) J. MICHAEL, Colonel,
Secretary to Government.

No. 31. ORDER THEREON, 5th June 1878, No. 2,387 W.

THE CHIEF the Governor in Council does not consider the work necessary, judging from the report of the Inspector-General of Ordnance and Magazines; and, as no funds are available except for works of necessity, must decline sanction to the proposed improvements.

(True Extract.)

From

Colonel M. Cadell C. 12

Inspector General of Ordnance and Magazines.

To

The Secretary to Government

Military Department.

Port of Spain.

Port of Spain.

Sir,

With reference to Order of Government
 No. 1713 W. dated 4th April/78, Public Works Department,
 received under cover of yours No. 1918, dated 17th Idem
 (Referring to the ~~gun carriage~~ ~~factory~~ ~~works~~), I have the honor to state for the in-
 formation of Government that the Superintendent Gun
 Carriage Factory has reported that there is no record
 of any article in course of manufacture ever having
 been damaged by the want of the covering applied
 for to the space between the 30 cwt. and 15 cwt. Steam
 hammers, of course every precaution is taken to prevent any
 possible damage.
 Neither has work ever been stopped on account
 of ordinary rain (it was stopped last year for 2 days
 during the heavy rain of May) but work would possibly
 be delayed in the taking of the precautions referred to
 above, that is to say work would not go on so freely.
 The chief object of the covering, however, is to protect
 the work people who, while exposed to the intense heat, are
 exposed by the furnace and boiler, are also liable to get wet
 from the falling rain.

2. Concurring.

Concurring in the views of the Superintendent.

I have the honor to be,

Sir,

Your most obedient servant,

R. A. A. A. Colonel R. A.

Supt. Genl. of Ord. & Supply.

In this case the
estimate was Rs 720
being in Madras I
visited the factory &
saw the place. I
had no hesitation in
saying the estimate
was very high -
the result is that it is
now stated it can be done
for 484 departmentally.
But I doubt the accuracy
and expediency of any
such outlay -
No work has been suffered
damage - The

It was not the want of
the proposed cover of a
small connecting space
which prevented work

The separation of
the 2 sheets - i.e. independent
of each other should
I think be lightly interrupted
with - Resonant by pie

The closing in of the
sides of weather board
seems to me likely to
lead to greater risk
of improving the heat
if smoke - than it
will cause benefit by
excluding slight drafts
of occasional rain
heat smoke & dust and
the necessity of the utmost perfect
ventilation. Malaria
are every day mosquitoes

The closing in of the
sides of weather board
seems to me likely to
lead to greater risk
of improving the heat
if smoke - than it
will cause benefit by
excluding slight drafts
of occasional rain
heat smoke & dust and
the necessity of the utmost perfect
ventilation. Malaria
are every day mosquitoes

The rain is a very
seasonal occurrence
and when it does
occur a very slight increase
is shown -

I am therefore disposed to
say the work is not nearly
done. The work of the
factory judging from the
report of the S. J. & S. of

4th May - and as we
have no funds for supplying
the necessity. To

obtain sanction -
referring to the fact
known of the fact. Installation
will be now needed for
supplying the
proposals
