GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

6th June 1878, No. 2,404 W.

Buildings and Roads.
Military Works.

Read the following paper:—

No. 38. From J. W. RUNDALL, Esq., District Engineer, Bellary, to the Chief Engineer, Buildings and Roads, Public Works Department, dated Bellary, 27th May 1878, No. 878.

I HAVE the honor to submit for the sanction of Government an estimate of Rupees 300 accompanied by a report for providing fresh doors, &c., to the solitary cells, lock-ups attached to the guard-room, bath-room and the canteen at Raman-droog.

2. The present pannelled doors attached to lock-ups and cells impede ventilation; it is therefore proposed to have half-barred doors in place of the pannelled doors.

3. Fresh doors are proposed to be provided for the canteen and bath-room in place of the present doors which are old and not worth repair.

4. The estimate also allows for supplying a Chubb's lock to the canteen which is said to be necessary because ordinary pad locks have frequently been tampered with.

5. The estimate has been approved by the local Military authorities and by His Excellency the Commander-in-Chief.

6. Funds can be provided from the budget assignment for "Minor New Works, Military."

No. 39. ORDER THEREON, 6th June 1878, No. 2,404 W.

SANCTIONED.

2. This sanction has been registered as Imperial No. 25 B of 1878-79.

Report to accompany the
Estimate for placing fresh doors to
Hospital, Guard room, Solitary Cells &c.
at Ramandroy.

Amount of Estimate Rs 300--

At present the doors attached
to Lock up and Cells at Ramandroy
are Panelled doors. It is proposed to
have half barred doors to the above in
place of the Panelled doors. This is done
to increase the ventilation, which at
present is considered insufficient by
the Medical officer in chge of the depot.
By placing iron barred doors, and with
the present ventilation on top, it is
presumed that ample ventilation will
be made, and has been approved of
by the above officers.

The present doors having often
been before this repaired, and will
Constantly.

Constantly require repairs, fresh doors
are therefore proposed. The Canton also
requires a Chubb's Lock. A strong lock
is necessary as it has been often broken
into and other locks tampered with.

The wood used for both
framed and iron barred doors to
be of well seasoned and sound wood.
The iron bars to be of one inch diameter
and tarred &c. The wood work to have
two coats of wood oiling.

The cost of removing and
replacing fresh doors will be
met from the sundries in abstract
estimate and all rubbish &c removed
and the work handed over to the
authorities in the usual way.
