PART II—Irregularities with respect to Appropriation for the Month of March 1878

Item No.	Particulars	Amount of Appropriation	Expenditure of the Year	Excess over Appropriation	Expenditure during Month	Opinion of the District Engineer with Final Remarks by Examiner	Orders by Local Government
1	Bellary Double latrine for European Infantry	RS	RS 1,200	RS 1,200	RS 1,200	The District Engineer appears to have utilised for this work the sum of Rupees 2,000 appropriated in G.O. No. 371 W, dated the 22nd January 1878, subsequently considered unnecessary. This was pointed out to be irregular in the absence of the sanction of Government.	12 The work has been budgetted for in the current year.
2	Mount Alterations and additions to the Butts to be converted into Rifle Butts at Gundy Park.		508	508	499	The District Engineer, in reply to a reference made by this office, reports in respect to estimate, but states nothing with regard to providing funds for this work. It is, however, too late now for making the necessary provision of funds.	13 The District Engineer should have applied for an appropriation of funds before the close of the official year.
3	Prandency Making improvements to the Gunpowder Factory	40,000	41,240	1,240	7171	The District Engineer reports that the excess is due to the adjustment of the value of mortar mulls supplied from Coorg, and that the adjustment had taken place too late to obtain sanction to an appropriation of funds.	14 It should be explained when the adjustment actually took place.
4	Constructing earthen traverses and masonry drain around the European Magazine at Vellore	1,410	2,366	974	593	The District Engineer's reply to a reference made by this office is awaited.	15 The reply should not be sent in for the information of Government.
5	Public Works Stores, Irondurg Tools and Plant	13,300	20,774	12,474	4,044	The District Engineer remarks that the cause of excess expenditure is due to the receipt of famine stores which were neither budgetted for nor were funds allotted to meet the expenditure. The District Engineer has been requested to state the amount due to famine, in order that it may be removed to the proper head of account.	16 The adjustment of this expenditure, as such, too long delayed, should be expedited.
6	Summerville Constructing grove work at Summerville		2,354	2,354	2,354	The District Engineer's reply to a reference made by this office on the 17th May 1878 is awaited.	17 It should be explained by the District Engineer why funds were not applied for before the close of the official year.
7	Tasur Repairing the shed at big yard, Muddacherry	886	1,578	692	12

8	Tools and Plant—New Supplies.	RS	RS 1,500	RS 1,550	RS 1,500	The District Engineer reports that the outlay represents value of tools received from the Public Works Stores too late for obtaining sanction to an appropriation of funds.	18 This requires further explanation by the District Engineer, who must have expected the tools some time before they were actually received.
