With reference to your memorandum No. 2,558, dated the 12th instant, I have

2 I have ascertained from the Collector's office that these reports were wanting
to make up the district return, but that, attention having been drawn to the matter,
the returns are now being received punctually.

The first of these is the fact that the
 C_{60} molecule is a truncated icosahedron,
 which is a polyhedron with 32 faces, 12 of
 which are pentagons and 20 are hexagons.
 This structure is very similar to a soccer
 ball, and it is this similarity that has
 led to the nickname "buckyball".

I have ascertained from the Collector's office, that these reports were wanting to make up the district return: but that attention having

having been drawn to the matter.
the returns are now being received
punctually
