No 353 From J W RUNDALL, Esq, District Engineer, Bellary, to the Chief Engineer, Public Works Department, dated Gooty, 18th June 1878, No 1,210

With reference to G O, No. 1,699 W, of the 4th April last, regarding subterranean water-supply, I have the honor to bring to your notice that since the beginning of 1877 a weekly record of the height of water in the wells at Bellary cantonment has been maintained

2 The principal well is that called the artesian, lying between the Fort Rock and the other large rock north of it. I have had this well connected with the railway levels so as to ascertain the level of the water with reference to the mean sea datum, and beg to forward a statement which gives the level of the water in the well on the first Saturday of each month. In future this information will be supplied once a month

3. Should the Government desire to be furnished with similar information for other wells in the cantonment it can be compiled and sent

No. 354. ORDER THEREON, 28th June 1878, No 2,681 W.

OBSERVATIONS at this one well will be sufficient. Those already taken appear to have been carefully noted.
