GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

16th September 1878, No. 3,663 W.

Buildings and Roads.
Civil Works.

Read the following paper :—

No. 198. Endorsement of the Chief Secretary to Government, Judicial Department, dated Ootacamund, 23rd August 1878, No. 1,504.

Proceedings of the Board of Revenue, dated 14th August 1878, Miscellaneous No. S, 307.

From W. J. TATE, Esq., Head Assistant Collector in charge, to the Collector of the Godavari District, dated Vadapally, 8th July 1878, No. 330.

REFERRING to your foot note to the Proceedings of the Board of Revenue, No. 172, dated the 8th January 1878, I have the honor to furnish hereunder the information therein required regarding the improvements of the Tanuku Tahsildar's Cutcherry:

Nature of the Improvement.

1. Brick-in-mud building wall in record-room to provide room for Sheristadar.

Necessity for the same.

There is no room at present for the Taluk Sheristadar. He sits in a small hall with all the Clerks seated around him. This creates noise and prevents the Sheristadar from quickly carrying on his magisterial work, and on the other hand the Gumastah's attention must be drawn away by the magisterial trials of the Sheristadar's proceedings in the same hall. It is therefore necessary to accommodate the Sheristadar with a separate room.

2. Iron-barred windows with frames for the Subsidiary Jail.

The present windows contain only wooden bars and this allows the prisoners all possibility for escape. Strong iron-bars will remove the evil now existing.

3. Venetian windows to Cutcherry.

On the north and south sides of the entrance to the Cutcherry hall there are two doorways intended for the admission of air and light. These doorways are now shut up by a structure made of split bamboos passed across them so as to allow holes for the entrance of light and prevent people from having access to the hall after the entrance is closed. This bamboo structure is unsafe and readily admits a passage for those who dishonestly wish to enter the hall. The substitution of venetian windows for these bamboo structures would render the records and furniture in the hall much more safe than at present.

4. Iron-barred doors to each room.

The room at present has two wooden and not very strong doors. The iron-barred doors would afford a better opportunity to the watchers of the treasury, of constantly keeping their eye upon it and render the room more strong and safe.

5. Windows to record-room.

The record-room has not a single window at present and the room being consequently dark has given shelter to bats which are causing damage to the records and rendering the room unclean. The construction of windows would drive away these bats and free the room from the evils caused by them.

In conclusion I beg to state that a new Cutcherry is undoubtedly required; but if it cannot be built soon the improvements above pointed out are urgent, and I therefore request that the Board's sanction for them may be obtained soon.

The Range Officer's estimate received with your letter under reply is herewith returned.

No. 184.

FORWARDED to the Secretary to the Board of Revenue with reference to their Miscellaneous Proceedings, dated 8th January 1878, No. 172, together with an estimate, amounting to Rupees 120, for making some improvements to the Taluk Cutcherry at Tanuku, with a request that they will obtain the necessary sanction of Government for the same.
