No. 275. From Colonel P. O'CONNELL, R.E., Superintending Engineer, Chingleput, to the Chief Engineer, Public Works Department, dated St. Thomas' Mount, 18th September 1878, No. 3,400.

I HAVE the honor to inform you that the Collector has, in consideration of the present state of the weather and the fact that a good supply of water is coming into the Red Hills Lake, suggested to me the expediency of adopting measures in view to the restriction existing under G.O., No. 3,053 W, dated 1st August 1878, to the issue of water from the lake for irrigation being modified. From the latest report of water in the Red Hills Lake I find that on the 15th instant the water stood at 40.90 or 1.59 above the limit, viz., 39.31, at which irrigation as usual under the tank was ordered to be permitted in G.O., No. 94 I, dated 20th June 1878. Under the circumstances I have this day directed the Range Officer to issue water from the lake for irrigation purposes as usual until further notice, subject to the approval of Government.

No. 276. ORDER THEREON, 25th September 1878, No. 3,762 W.

THE District Engineer's action is approved.
