GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

7th April 1879, No. 1,088 W.

General.
Account.

Read the following paper :—

No. 86. From Lieutenant W. L. C. BADDELEY, R.E., Acting General Superintendent of the Public Works Stores and Workshops, to the Chief Engineer, Public Works Department, dated Madras, 2nd April 1879, No. 40.

With reference to G.O., No. 616 W, dated 28th February 1879, I have the honor to report that I have been informed personally by Mr. Pogson that he will not be able to undertake the working of the semaphore from the Motor clock at the Observatory until the necessary electrical arrangements have been carried out to his satisfaction, including an electro-magnetic apparatus similar to the one I suggested being used, but with certain improvements which Mr. Pogson states are absolutely necessary in order to avoid frequent adjustments and alterations, each of which would involve his personal supervision at the Master Attendant's Office.

2. Under these circumstances I would beg to suggest that application should be made to the Madras Railway Company to allow Mr. Winter, in communication with Mr. Pogson, to make up the apparatus required, and also to carry out the electrical arrangements.

No. 87. ORDER THEREON, 7th April 1879, No. 1,088 W.

THE Agent of the Madras Railway Company will be requested to allow Mr. Winter, in communication with the Government Astronomer, to make up the apparatus required for working the semaphore at the Master Attendant's Office from the Motor clock at the Observatory.

2. The Government Astronomer will give Mr. Winter all the assistance in his power.

Enclosure.

With reference to G.O. No. 116 W. dt. 28th February 1879
I have the honor to report that I have been informed
personally by Mr. Poyon that he will not be able to
undertake the working of the Sinephore from the Master
Clock at the Observatory until the necessary electrical
arrangements have been carried out to his satisfaction,
including an electro magnetic apparatus similar to the
one I suggested being used, but with certain improvements
which Mr. Poyon states are absolutely necessary in order
to avoid frequent adjustments and alterations, each of
which would involve his personal supervision at the
Master Clock Office.

2. Under these circumstances I would beg to suggest that
application should be made to the M. Ry. Company to
allow Mr. Winter in communication with Mr. Poyon
to make up the apparatus required and also to carry
out

and the electrical arrangements.
