

No. 6990.

3rd mile Super Engineer's Office
Cuddalore 28th Nov^r, 1879.

From

Dist^l 1st Dec^r

The Superintending Engineer
3rd mile.

To

The Chief Engineer

Public Works Department.

Sir,

I have the honor to bring to your notice that it has been found impracticable to work the existing temporary sand bag Lock at the head of the Southern Canal, owing to most of the bags and piles having ^{become} rotted. It is proposed, instead of rebuilding this Lock on its present site, in the branch channel, (which will entail the expense of the removal of the existing structure) to build a new temporary Lock in the main head of the Canal, leaving the branch channel in which the present temporary Lock is situated

- ed

ed to serve as an outlet or inlet
in contingencies just as the main
head ^{has} with a line across it, hitherto
served. I have in anticipation of
your approval ordered the work
to be proceeded with.

I have the honor to be
Sir

Your most obedient servant

Henry W. Hunt Major &c.

Adj. Sup. Engineer 3^d Circle.
