Local Funds Reports.

Read the following paper:—

No. 94. *Proceedings of the Board of Revenue, dated 2nd August 1879, No. 2201.*

ABSTRACT.—Submitting to Government the Local Fund Report of Chicacole Circle, Ganjam District, for 1878-79, and stating that the irrecoverable arrears of land cess for Fasli 1280—1286, amounting to Rs. 492-15-4, may be written off the accounts.

No. 95. ORDER THEREON, 25th November 1879, No. 2205.

The Chicacole Circle report for 1878-79 shows that the receipts excluding Public Works refunds amounted to Rs. 67,622, of which Rs. 60,502 formed the collections on account of land cess. No particulars have been furnished in regard to this most important item of revenue. The demand, collection, and balance on account of ryotwar and the several zemindari estates should have been particularised, and it is not understood why the collection of arrears were slack as stated by the President. It appears from the abstract appended to paragraph 51 of the Vice-President's report that the recoverable arrears, Rs. 6,746-12-11, go so far back as Fasli 1281. The President should issue stringent instructions for the recovery of old and long-standing arrears.

2. Under Public Works the expenditure on communications is given at Rs. 11,110 for new roads and Rs. 53,558 for repairs against Rs. 8,000 and Rs. 39,060 respectively allotted in the budget. The increase is stated by the President to be nominal, being due to adjustments made by the Examiner. The Vice-President in paragraph 25 gives the actual expenditure on road repairs at Rs. 22,044, but does not explain the difference between this figure and that given by him in paragraph 23, Rs. 53,558. The Board of Revenue deduct the Public Works refunds, Rs. 38,050, and show the actual expenditure under Grant I at Rs. 51,581 instead of at Rs. 89,632 given in the Vice-President's accounts. The refunds having been made owing to stoppage* of works, they could not have

* *Vide* paragraph 3 of Vice-President's report. been included in the expenditure as presumed by the Board of Revenue. The figures in the report are thus confused and unintelligible. The enclosure referred to in paragraph 4 of the Board's Proceedings has not been forwarded to Government, and their remark at the close of paragraph 3 seems to refer to the Chatterpore Circle report, Chicacole being apparently a clerical error. The Government are not satisfied that the nature of the adjustments in the two circles was similar, as in Chatterpore the refund was due to changes in the Public Works ranges and was therefore clearly nominal, while in Chicacole it was for work stopped and could therefore affect only the receipt side. The Examiner will explain clearly the state of the Public Works expenditure in the circle, distinguishing nominal adjustments from actual expenditure. The Government note that the greater portion of the expenditure on the maintenance of the roads during the year was lost to the circle by the damages caused by the floods in December, but that the principal communications have been made passable by the exertions of the officers of the Public Works Department.

3. The number of combined system schools appears to have been 86, not 80 as stated by the Board of Revenue. The falling off in the attendance is ascribed to English not being taught in them. G.O., 28th September 1876, No. 1744, sanctioning the establishment of the combined system schools in the circle, permits the teaching of English. The President will explain why it has been given up. Fees seem to be collected in these schools and appropriated by the masters. The results of the examination in these schools should have been compared with those of the previous year and the extent of progress made during the year reported. As regards results grants, the reduction in the number of schools and in the amount of grants indicate so far a check to progress of education in the circle, but judgment as regards the permanent effect of the revised rules should be suspended till the current year's results are known. Meanwhile the Inspecting Schoolmasters should be made to help managers of results schools in training the pupils in their schools and in instructing them on points on which greater amount of preparation will be necessary than heretofore. It may reasonably be hoped that with such previous preparation, and with the lowering of the standard in arithmetic recently sanctioned, the results of the current year will prove more satisfactory than those of the last.

	At the close of	
	1877-78.	1878-79.
Number of schools ..	203	152
Grants paid during the year	Rs. 3,006	2,150

4. With reference to the itinerating of the Medical Officers, whose services are said to be much appreciated by the public, the Government presume that the regular work of the dispensary was conducted by a separate staff and that its working was not interfered with by the itinerating system as was the case in the Chatterpore Circle. The attention of the Surgeon-General, Indian Medical Department, will be drawn to the subject.

5. The attention of the Sanitary Commissioner will be requested to the high cost of vaccination in the Telugu circles referred to by the Board of Revenue.

6. The President should have explained why the full amount of the provision for sanitation was not expended. More attention should be directed to this important branch of Local Fund administration. Some provision should also be made for markets and choultries.

7. The expenditure on four travellers' bungalows in the circle was Rs. 349 against Rs. 50 realised from fees.

8. The interest taken by the non-official members in the working of the Board should have been commented on by the President.
