GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

7th May 1880, No. 1,101 W.

General
Establishment.

Read the following paper :—

No. 5. From G. T. WALCH, Esq., Superintendent of Works, Kistna District, to the Chief Engineer, Public Works Department, dated Camp, Chettipett, 22nd April 1880, No. 176 K.S.

I HAVE the honor to forward herewith, for your information, a copy of letter No. 36, dated 16th instant, received from the officer in charge, Eastern Division, Kistna, reporting on the work done by Sergeant Coney and Corporal Hazard of Madras, who took photographs at Amaravathy, Kondapilly, and Bezvada.

From C. J. PETERS, Esq., Executive Engineer, Eastern Division, Kistna, to the Superintendent of Works, Kistna, dated Kistna, 16th April 1880, No. 36.

I HAVE the honor to report that the Photographers, Sergeant Coney and Corporal Hazard, arrived here on the 17th March and left on the 2nd instant, after taking photographs at Amaravathy, Vundavelli, Kondapilly, and Bezvada of archaeological remains, &c. They appear to have carried out their instructions satisfactorily except in the case of the interior views required of Vundavelli cave temples, which they found to be impossible owing to insufficient light. The magnesium wire was not found to answer though they seem to have tried every means in their power to make it succeed and spoilt several plates in the attempt. The view of the interior cornice that was also particularly required was a failure, the camera could not be got near enough to join it.

2. Sergeant Coney and Corporal Hazard have shown praiseworthy energy in getting their work done under considerable difficulties, especially on the hills at Kondapilly, and have spared no pains to carry out their instructions.

No. 6. ORDER THEREON, 7th May 1880, No. 1,101 W.

RECORDED with the remark that the work has been very well done, although the men failed in the interior views probably from want of practice and experience in the use of artificial light.

Sir,

I have the honor to report that the Photographers Sergeant Coney and Corporal Hazard arrived here on the 17th March, and left on the 2nd Instant, after taking Photographs at Amravathi, Thundavalli, Condapalli and Bernada of archaeological remains &c. They appear to have carried out their instructions satisfactorily except in the case of the interior views required of Thundavalli cave temples which they found to be impossible owing to insufficient light. The magnisium wire was not found to answer though they seem to have tried every means in their power to make it succeed and spent several plates in the attempt. The view of the interior cornice that was also particularly required was a failure, the camera could

could not be got near enough to join it.

2. Serjeant Coney and Corporal Hazard have shown praiseworthy energy in getting their work done under considerable difficulties especially on the hills at Bondapalli and have spared no pains to carry out their instructions.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

2. Next, it is essential to gather relevant information and data. This can be done through research, consultation with experts, or by analyzing existing data sets.

3. Once the information is gathered, the next step is to analyze it. This involves identifying patterns, trends, and relationships that can help in understanding the problem more deeply.

4. After analysis, the next step is to develop a solution or a plan of action. This should be based on the findings of the analysis and should take into account all relevant factors.

5. Finally, the solution should be implemented and monitored. This involves putting the plan into action and tracking its progress to ensure that it is effective and meets the requirements of the task.

A black and white photograph of a large, irregularly shaped, light-colored object, possibly a piece of paper or a small animal, with a dark, textured border. The object has a mottled appearance with various shades of gray and black, suggesting a complex internal structure or texture. The overall shape is somewhat elongated and tapers towards the bottom.
