Civil Works.

Read the following paper:—

No. 34. From Major H. M. VIBART, R.E., Acting Superintending Engineer, Third Circle, to the Chief Engineer, Public Works Department, dated Chepauk, 16th January 1880, No. 243.

WITH reference to your memorandum No. 3,279, dated 29th October 1879, I have the honor to state that I applied to the President of Municipality for an estimate for laying pipes to the boat basin at Cochrane Basin Road.

2. The Vice-President has furnished me with an estimate amounting to Rs. 3,101-5-1. The estimate is a large one as the nearest municipal pipe is 950 yards from the basin. The pipes of the Seven Wells system run close to the basin, and the system could be extended so as to include the basin at a cost of Rs. 750. If the Seven Wells water is still to be supplied to the Gunpowder Factory, it would seem preferable to supply that water to the basin at a cost of Rs. 750 rather than bring the Red Hills water a distance of 950 yards at a cost of over 3,100 rupees. If, on the other hand, it is determined to abandon the Seven Wells supply and furnish the Gunpowder Factory with Red Hills water, the pipes which are now in use could be utilised to convey the Red Hills water to the Gunpowder Factory, and a branch could be run from this to the basin at a cost of Rs. 750.

3. In any case it would seem certain that the present pipes will be used, even if it is determined to supply Red Hills water, and as it will probably be some time before the Seven Wells system is abandoned, I would recommend that a 2-inch branch pipe should be laid to the basin from that one which at present supplies the Gunpowder Factory.

No. 35. ORDER THEREON, 26th January 1880, No. 195 W.

THE Superintending Engineer's proposal to lay a 2-inch pipe to the basin from the pipe which at present supplies the Gunpowder Factory with Seven Wells water, at a cost of Rs. 750, is sanctioned. The amount will form a charge against the Buckingham Canal and will be met from the current year's appropriation for that work.

To
The Chief Engineer,
Public Works Department.

Sir,

With reference to your Memo No. 3279 dated 29th October 1879. I have the honor to state that I applied to the President of Municipality for an estimate for laying pipes to the boat basin at Cochrane Basin Road.

2. The Vice President has furnished me with an estimate amounting to Rs. 3101-5-1. The estimate is a large one as the nearest Municipal pipe is 950 ft from the basin. The pipes of the Seven Wells system run close to the basin and the system could be extended so as to include the basin at a cost of Rs. 750. If the Seven Wells water is still to be supplied to the Gun Powder Factory, it would seem preferable to supply that water to the basin at a cost of Rs. 750.

rather than bring the Red Hills Water
a distance of 950 yards at a cost of
over 3,100 Rs. If on the other hand
it is determined to abandon the Seven
Hills supply and furnish the Gun Powder
factory with Red Hills water. the
pipes which are now in use could
be utilized to convey the Red Hills
water to the Gun Powder factory-
and a branch could be run from
this to the basin at a cost of Rs 750.

3. In any case it would seem
certain that the present pipes will
be used. even if it is determined
to supply Red Hills water. and as
it will probably be some time before
the Seven Hills system is abandoned.
I would recommend that a 2" branch
pipe should be laid to the
basin from that one which at pre-
-sent supplies the Gun Powder
factory.

I have the honor to be

Sir

Your most obedient servant

Arthur Wilson Major R.E.

Ag. Superintending Engineer 3rd Circle.
