GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

17th August 1880, No. 1,966 W.

General.
Account.

Read the following paper:—

No. 44. From Major D. H. TRAIL, R.E., Officiating Examiner, Public Works Accounts, to the Secretary to Government, Public Works Department, dated Madras, 27th July 1880, No. 75 W.

I HAVE the honor to forward herewith, for the orders of Government, the Local Funds Objectionable Item Statement for April 1880.

2. The only suggestion I can offer in respect to remedying the objections noticed is that the local Government authorise me, in the case of incomplete works, to accept the outlay already incurred without or in excess of estimate. With regard to the future expenditure on these works, the Local Fund Boards concerned should take steps to have the necessary estimates prepared, Executive Engineers of course furnishing them with full information.

3. For works completed to end of last year, as also for those repair estimates which as per Madras Code, paragraph 1,075, lapse with the close of the official year, Executive Engineers should comply with G.O., No. 1,418 W., dated 17th June 1880, and submit the required completion reports without further delay to this office.

4. With regard to the work vouchers still wanting, as it is of little or no use submitting them to this office at this late date, Executive Engineers should be instructed, when making over the works to the Local Fund Boards, to furnish the Presidents concerned with as much information in regard to the details of work done as they possibly can.

5. I enclose herein, for your information, copy of a circular I have issued to Executive Engineers on the subject of transferring to Local Fund Boards the incomplete Local Fund works at end of last year.

MADRAS,
July 1880.(Signed) D. H. TRAIL, Major, R.E.,
Offg. Examiner of Public Works Accounts.

Circular from the Examiner of Public Works Accounts, to all Executive Engineers.

With regard to incomplete works of last official year handed over to Local Fund Boards for completion, I have the honor to request that you will, at once if you have not already done so,

furnish the President of each Local Fund Board with a list of the works thus transferred to them for completion, showing exactly the amount of estimate, the value of work done to date of transfer, the payments made up to the same date, the arrears remaining unpaid and to whom due, and also the quantity and value of work remaining to be done on each sub-head of estimate.

2. A copy of the above list should be furnished to this office without delay, together with another list showing the number and description of tools handed over to the Board, duly receipted by the President.

3. You should also furnish the President with a memorandum showing the orders, if any, remaining to be complied with on each work, and of such matters as may most require his attention, with full explanation of any peculiarity of circumstances or apprehended difficulties.

4. Should any of the works be under construction by contract, full particulars regarding the terms, &c., should be communicated to the President.

No. 45. ORDER THEREON, 17th August 1880, No. 1,966 W.

The attention of Government having been drawn to the defects of the form in which the statements of objectionable items are at present prepared, the substitution of the annexed form is directed.

2. A separate statement will in future be submitted in triplicate for each circle and Superintendentship of Works; one of the copies being returned to the Examiner with the orders of Government in manuscript, one to the Superintending Engineer or Superintendent of Works, the third being recorded in the Government Office.

3. The Examiner is authorised to accept the outlay incurred up to 31st March 1880 on incomplete Local Fund works without or in excess of estimate. Instructions will be given in the Financial Department to the Local Fund Boards to have the necessary estimates prepared, Executive Engineers furnishing them with full information.

4. The suggestions contained in the 2nd and 3rd paragraphs of the Examiner's letter are approved, and the necessary action will be taken by the Public Works Officers concerned.

Major Rail will, I suppose, have no objection to sending the form in triplicate. The second form has been drawn to the Government having been drawn to the defects of the printing in this respect, as form, in which the there was no previous statements of objection made for sending the able items ^{at present} are prepared, order of the S.E. concerned. It should direct the substitution be printed out that of the annexed form. Three copies must now be made. It was thought 2. If strong pressure is

ought to be so
small that the

trouble of making
three copies of
each list will be
little more than that
of making two.
The land & irrigation

as few & very long.

In the C's 3rd para. (letter)
he refers to para. 1075

I would suggest the
 insertion of the date to be to

 be applied on works before

 My O.D. of yesterday will

Do you wish to add anything to the enclosed order.

Now that the Local Fund Works have been almost wholly removed from charge of this Department, it is very desirable that the irregularities of past years should be removed with the least possible delay, and I should be glad if you would suggest how this can best be done.

IN REGARD TO THE PROPOSED

APPEAR TO MEET THE REQUIREMENTS
OF THE CASE; IN REGARD TO PARA 3,
HOWEVER, I WOULD REMARK THAT THE

FOR ORDERS.

The undersigned
has been discussing
the objectionable item
statement form with
the Examiners.

2. The present form
is considered to be
very faulty, & to con-
tain much needless
repetition, while the
cost of printing it is
considerable.

3. To give the H. M.
some idea of how
much printing is
involved a collection
of statements under the
different heads of

Approved

Cir. 17-6-80. Ret. 19-6-80.
P.L. Sheet 52 June

Services for six months is enclosed.

4. In Mysore and in the Punjab such statements are not printed, but are submitted in duplicate by the Examiner to the Secretary - one copy being returned to the former Officer with the orders of Government in manuscript and a separate statement was sent in for each circle.

5. A copy of the form is annexed which the H. M. will, it is thought, consider to be in every respect superior to that now in use.

6. It is proposed to have an additional

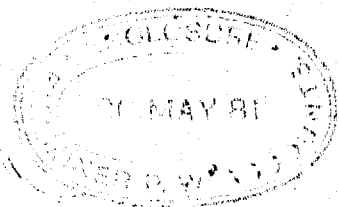

column (that in red ink) showing the month in the accounts of which the irregular expenditure was first incurred.

7. It is suggested that ^{for} the present form and system should be substituted & the form annexed and the system above described.

8. The H. M.'s attention is requested to the Office Notes that have appeared on the subject.

16/6/50

FOR ORDERS.

C. Please suggest
some means for
diminishing the
work of compilation
and printing in these
objectionable items.

I cannot myself see
why either column
3 or 4 is necessary to
be abolished — as also the
red ink marginal
notes which add nothing
to the information.

There is some mistake
in the words "Estimate"
and "Appropriation"
Column 5. I should
not myself care to
retain the column
at all.

~~any more~~

If Column 6 is retained and is taken to show all looked into during the year to date, then Column 8 is unnecessary.

In this statement coming out of sides there are no less than six repetitions of the headings of the Columns, all of which might be saved by printing one for all on the first page (back being left blank) and the sheets being over so as to show this.

In any case a reform of this return

is much needed as in the aggregate the expense of turning it out must be considerable.

Altho

25/5/80

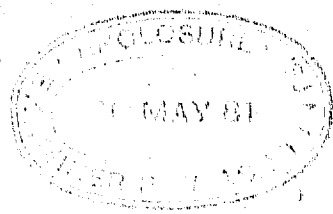

If however comes up ordinary work too late

In (2)

The whole form is I think bad as it does not give the required information at a glance. For instance in Col 8 & 9 it at first appears uncertain whether the object refers to "Return" or "Approvals" or both & it is not until the heading is looked to that the doubt can be settled.

I would propose to alter the form as follows

unimpaired

substitute the S.O. I.
form with an additional
Col below how often
the objections had been
brought forward. It is
clear & distinct -

As regards the printing
I would ask, is it
necessary to print the
form at all?

They were not printed
in the Punjab but
the statements were
submitted by the Secy.
to the Secy in duplicate
one copy being returned
to the Secy with the
orders of the L. Govt. in
manuscript. I sh^d
mention that a separate
statement was submitted
for each circle -
The best way of diminishing
the work in regard to
this statement in all
the offices concerned -

would be for the Secy to
take the necessary
measures for obtaining
the required sanction &
appropriations before the
accounts come to be
audited. There is an
expenditure of at least 7 lakhs
which sh^d surely be
sufficient in most
cases to prevent any
objections at all being
raised -

J. W.

Yes - our proposed
procedure was what
the Secy describes and would
be very simple & effective
but whether specifically
suitable to the Punjab
remains to be seen
It is our hope
our opinion as to the

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or printed text on the paper. The lighting is slightly uneven, with some areas appearing brighter than others, particularly towards the top and bottom edges. A small dark smudge or mark is visible near the bottom left corner.

[The page contains faint horizontal lines, suggesting it was part of a lined document or notebook.]

This image shows a vertical strip of a document page. On the left side, there is a dark, textured vertical band, likely representing the binding or the edge of the paper. The rest of the strip is a white, textured surface, possibly the paper itself, showing some minor speckling and a slightly uneven texture. There is no text or other content visible in this strip.

I think the term
Joseph B. C. is far
more convenient than
our own, and we
see objection to its
adoption in this
Presidency -

I also agree with him that separate returns, in manuscript, for each circle are much superior to one printed return for the whole Presidency -

The S. E. III line is
in no way interested in
having that the E. E.
by a gap between the
in all moments -

You remember that it

comes up the late, but
I do not think we can
expect to have the earlier;
the Divisional accounts
are not due in the
C's office till the 20th
of the month following that
to which they refer, and
some are always late. We
get the C.I. statement to-
wards the end of the second
month, which is as soon as
we can expect it -

C's last suggestion in
his note of 28th, as to the
"best way of diminishing the
work in regard to this
statement" is an excellent
one, but the millennium
will probably arrive before
it is carried out -
Might it not be worth

while to enter in the
return only items which
had been objectionable for
more than ~~three~~ a
certain time, say three
months? This would be
probably one the cutting
of a number of merely
technical irregularities,
due to urgent necessity,
in commencing work, were
right as to part of
appropriations &c. - The
return for March 1900
year should in this
case include all
irregularities -

It is also a question
whether the items of
"work abstracts and sub-
mitted" should not be
left out altogether - The

use of such abstracts is
supposed to be that the

examiner may examine some
sort of "sentences" over
rates, and "exam E.E."

of impending excesses over
estimates - It is however

quite certain that no
such sentence is ever
examined, and that the

C's Office never gives any
information to E.E's upon
this subject - The person

person to examine rates
is the S.E., and if the
"register of works" is properly

kept up, he can examine
the necessary book to the
fullest extent - I would
relieve the Examiner altogether
of a duty which he cannot
possibly perform - D. 26

* a remark to this effect
used to appear in the O.I.
statement, but I am
glad to see that it has
disappeared & late -

C.

You will see from the
annexed note by the
J.W. that we are all
now pretty well agreed
as to the reform of the
Objectionable Item Statute
and that we have only
now to discuss the
two points (a) and
(b) which I have marked
in his note

I must say I do not
go into the J.W. entry
in regard to attain

Of E.E. and S.E. always
did their duty in all
cases we shall have
little or no use for an
Objectionable Item Statute
at all, and I can safely
say that we had thought
you cautious in dropping
my name attached to
decided biliousness as

regards this matter but this was only done by
The proposal (a) is
apparently harmless but
I should much doubt if
we can as yet afford to
adopt it.

As regards (b) even in the
low period that your office
action on reports rates is
after all only a "useful
fiction" still less otherwise
is that steady climb to the
maintained which is so
necessary even with SES?
Quis custodiet custodes?

Your Office may probably
be, but as yet has been able
to give the timely warning
about probable excess of
rates. Can you not
see the time when it will
be too late?

On receipt of your
reply I shall be pre-
pared to take action
in regard to the O/S.

PUBLIC WORKS DEPARTMENT.

PROCEEDINGS OF THE MADRAS GOVERNMENT.

Under date the 18th Aug/50.

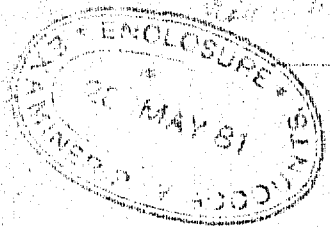

Read the following:—

From the Examiners, } P.W. Accts } P.O. No. 90 W of 27 July/50
1966/34

The attention of Govt.
having been drawn to
the defects of the form
in which the state-
ments of objectionable
items are at present
prepared, direct the
substitution of the an-
nexed form.

2. A separate state-
ment will in future
be submitted in triplicate for each Circle and
Superintendence of
Works; one of the copies
being returned to the
Examiners with the
orders of Government
in manuscript, one
to the Suby Engineer or

Superintendent of Works,
the third being recorded
in the Government
Office.

3. The Examiner is
authorized to accept the
outlay on incomplete
Local Fund works in-
curred without or in
excess of estimate. In-
structions will be given
in the Financial Dept.
to the Local Fund Board
to have the necessary esti-
mates prepared, Execu-
tive Engineers furnishing
them with full infor-
mation.

4. The suggestions con-
tained in the second
and third paragraphs
of the Examiner's letter
are approved, and the
necessary action will
be taken by the Pub-
lic Works Officers con-
cerned.
