22nd December 1880, No. 2,938 W.

Buildings and Roads.
Civil Works.

Read the following paper:—

No. 87. From F. N. THOROWGOOD, Esq., M. Inst. C.E., Superintendent of Madras Harbour Works, to the Chief Engineer, Public Works Department, dated Madras, 7th December 1880, No. 67 W.

In reply to your memorandum, No. 2,618, of 22nd November, I have the honor to forward a tracing of a channel for carrying off the rain water from the drain close to the south pier of the harbour.

2. There will not be much difficulty in keeping the mouth of it clear, and it will confine the rain overflow within proper limits instead of allowing it to run wild as at present, and as you observed on the 22nd November when inspecting the works.

3. The cost of this channel built in cement would be about Rs. 893, and if it were thought desirable afterwards it could be arched over and extended right into the water.

No. 88. ORDER THEREON, 22nd December 1880, No. 2,938 W.

THE estimate amounting to Rs. 893, prepared in the Chief Engineer's office on the plan submitted by the Superintendent, Madras Harbour Works, for a channel to carry off the rain water from the drain close to the south pier of the harbour into the sea, is sanctioned.

To
The Chief Engineer
Public Works Department
Fort Saint George
MADRAS, 22nd December 1880

SIR,

In reply to your Memorandum
No. 2618 of November 22nd I have
the honor to forward a tracing
of a channel for carrying off
the rain water from the drain
close to the South Pier of the
Harbour.

2. There will not be much
difficulty in keeping the mouth
of it clear, and it will confine
the rain overflow within proper
limits instead of allowing it to
run wild as at present, and as
you observed on the 22nd November
when inspecting the works.

3. The cost of this channel
built in cement would be
about Rs. 893, and if it were
thought desirable afterwards

it could be arched over and
extended right into the water.

Have the honor to be,

Sir,
