GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

12th April 1880, No. 945 W.

General.
Establishment.

Read the following paper :—

No. 33. From J. W. RUNDALL, Esq., Acting Superintending Engineer, Fifth Circle, to the Chief Engineer, Public Works Department, dated Trichinopoly, 27th March 1880, No. 1,146 T.C.

With reference to your memorandum No. 791, 9th March, I have the honor to report that on referring to the Agent, South Indian Railway, I learn that the *minimum* space required for his office accommodation is 13,032 square feet.

2. The total area of the European Detail Hospital is 6,600 square feet, and the area of the subsidiary buildings 4,600 square feet more, thus falling short of the area required for Railway offices by nearly 2,000 square feet.

3. The contagious diseases ward, completed only in 1878, would make a good residence for an European Overseer and his family, and the Apothecary's quarters attached to the hospital might be occupied by an Assistant Engineer, if there is one stationed in Trichinopoly.

4. I would therefore propose to move my office, that of the Executive Engineer and the Overseer with his stores and tools to the building given over to us by G.O., Military Department, No. 1,195, of the 23rd February.

5. As you have seen the buildings you are aware of their suitability.

6. My present office will be given up to the officer commanding according to the Government order above quoted, and the Executive Engineer's present office will be given back to the Revenue Department, it having been made over to us by the Collector in November 1878.

No. 34. ORDER THEREON, 12th April 1880, No. 945 W.

THE arrangements proposed by Mr. Rundall are approved and sanctioned with reference to G.O., Military Department, No. 1,195, dated 23rd February 1880.

2. The question of the temporary barracks at Trichinopoly being sold to the South Indian Railway will be referred to the Consulting Engineer for Railways for report.

J. W. Randall Esquire
Asst Engrs Office 5th Circle

To,

Colonel R. M. Lankey C. B. R. E.
Chief Engineer S. I. R. D.
Madras.

Sir,

With reference to your
Memorandum No. 791 without date, I have
the honor to report that on referring
to the Report S. I. Railway, I
learn that the minimum space re-
quired for his office accommodation
is 15,032 sq. feet.

2. The total area of European
Detail Hospital is 6,600 sq. feet,
and the area of the subsidiary build-
ings 4,600 sq. feet more, thus fall-
ing short of the area required for
Railway Offices by nearly 2,000 sq.
feet.

3. The Contagious diseases
ward completed only in 1878 would

make a good residence for an European
Quartermaster and his family and the Apo-
theosy's quarters attached to the
Hospital might be occupied by
an Assistant Engineer, if there
is one stationed in Freshwater.

14. I would therefore propose
to move my office, that of the Execu-
tive Engineer and the Quartermaster
with his stores and tools to the
building given over to us by G. O.
Military Department No 1195 of the
29th February.

6. As you have seen the Build-
ings you are aware of their suitability.
My present office will be
given up to the Officer Commanding
according to the G. O. above quoted,
and the Executive Engineer's present
office will be given back to the Revenue De-
partment, it having been made over
to us by the latter in November 1878.

I have the honor to be

Yours Most Obedt Servt

L. W. Russell

No. 2210

In name,

The Supr Engineer
51 mile

To,

The Chief Engrs
P.W.D.

W. H. T. C.

Dated 27th March 80.

Regarding the
European Detail
Hospital at
Trichinopoly —

The air unit's advice
can be said to have
been already given
in the past.

The question of the
imp. building
is not a question
of the building
itself but of the
cost of the building.

1/1/80

For order

I examined the
building, advised
it in the annexed
letter to the Supr
Engineer's Office
on the 26th ultimo.

The total area
of all the buildings
any part of which
is not over
500 square feet
the aggregate when
combined with the
other buildings requires
2,000 sq. ft. of space
at his own immediate
office in London.
He would therefore
not have been suffi-
cient to meet his
requirements, whereas
the other buildings

I consider that
if made over
this Department
as suggested by
Mr. Randall &
only could his
Office but that
the Executive and
Sub-division Office
be accommodated
but room could
be assigned in the
vicinity of
Overseers in the
Contingent War
as also for an
Engineer in the
Apportioning
I therefore beg
recommend that
groups of buildings
which are being
constructed,
being centrally located
and in good
be made over

Our Department
of the Agent S. R.
wishes he could
have ample room
in the European Room,
which though closed
as temporary structures
are in need of repair
and in many
respects well suited
should say for his
requirements. Of this
however he will surely
be best judge
