1 Report.

At present there is ^{no} Plunge
Bath for the Boys at the Lawrence Asy-
lum the one that formerly was used having
been made use of in the extension of the
Filters in 1879.

A Plunge Bath is much required and
on the 7th June/80 when inspecting the
Lawrence Asylum the Supg. Engineer
proposed that an old masonry reservoir
that can be supplied by an existing
channel from the present water channel
should be made into a Plunge Bath
and the Estimate now forwarded amounting
to Rs 2180 provides for doing this.

This Cistern is situated a little

South

South of the Asylum close to
the road and is conveniently situated

The Bath proposed is 56 ft. in length
10 ft. wide at the bottom and $12\frac{1}{2}$ ft.
at the top. It is proposed to have
a brick wall 10 ft. high built on South
or Road side pillars on the North
side and the whole covered with a
Corrugated iron roof. a flight of
Steps will be built at the west end
of the Bath and a Wooden Bench
along the brick wall for the Boys to put
their cloths on.

The abstract Estimate in duplicate
Report by Executive Engineer and the
Plan of the proposed Bath are forwarded
to Government for sanction with a
strong recommendation that sanction
should

should be given for the work to be
carried out this Official year.
