Master General that statement
A.I. for Cannanore provides
for a Garrison Battery of

or leading [extravagance,
especially in India
which item implies
Ft^as thereby & annual
over Onie due

Item 9. At before noted
£ 8h^m for increase
station is only req^d
for one staff sergt^t.

Item 10. As noted by
the Chief Engineer
on a previous paper
it is a pity [swell
a statement by an
unnecessary entry

// It may be noted here,
though it has reference
alt[o] the demands
for the Infantry Regi-
ment — that most of
the proposals for new
Buildings are rendered
almost impossible by
the already crowded state

alt[o] N[orth] Britain
at 2 a t. ft^s is
allowed [the
same rate as
for a habitable
building! If
this is according
to a standard plan
it might well be
revised at a
military conven.

of the Fort.

And in this smaller form I think have thought it waste of the time of Fort.. & of all concerned, with much waste of paper & clerking to bring forward impracticable propositions.

Infantry

Item 11. Repairs & roofing may possibly be very necessary, but the estimate seems enormous, & perhaps it includes accommodation for 2 more companies / 8 Serjts & 157 men on the supposition that they are to be quartered in that Garrison.

Item 12. Probably the present arrangement whatever it is, will suffice a little longer.

Item 13. This apparently is really to be an alteration to an existing building which has been altered. Hence the alteration of the figures here & in Item 14. which is a case connected with it. Still the original figures seem to show the extravagance of the estimate - item 8. for mess for 5 Artillery Serjts

The remaining items seem all subject above to the utterly impracticable, if not altogether beyond absolute requirements from want of building space in the Fort.

Major Hobart's memo on Proposals &c—

Forecast & Statements of Military Expenditure Centre District, Cape & St. Thomas's Mount &c.

Fort Saint George.

R.N. Item 1. The proposal to build a married quarters for R.N. is founded on the supposition that a whole Battalion of Infantry will require all the accommodation in the Fort.

But it may be remarked that this seems a faulty & improper arrangement by which the Senior Corps shall not have its fair share of the accommodation, as they are quite as much a permanent & essential part of the garrison.

Again since the Fort

will not accommodate a Battalion of 2 Coys. & a garrison Battery as well, 2 Coys. (those removed from Richmond Hy) might be quartered at St. Thomas Summerhill where there are plenty of spare barracks & unarmed quarters.

// It appears odd that the quarters of Band 2 Tpr the 4th Cost more per s. ft. than Sergeants.

Item 2. At the R. A. Dept. of Ordnance. I do not know who this is. If he is a Sergt. of the Ordnance Dept. he is probably already quartered elsewhere. If he is a Sergt. of the Battery with temporary rank & as he is not really entitled to quarters.

// Anyhow the Ordnance on the works is so very carelessly looked after, such a man deserves no consideration.

// It may be observed that this temporary staff Sergt. appears to be one of the 2 S.S. mentioned in Item 9. Since there is only one S.S. [the Sergt. Major] in a garrison Battery.

Items 3, 4 & 5. may be desirable, but can probably wait.

Item 6. can probably wait. I think it is doubtful whether a detached Battery, especially a Garrison one, can claim a special Orderly Room. Such accommodation is not by any means always allowed at home. A Major is expected to fit in a spare Barrack room for the

Com. If not to use
his own room.

The admission of such
an item is, in my
humble judgement,
one of the greatest cankers
of that extravagancy in
Keeping expenses of the
Army

Item 7. I think have
thought one Pathway
Path as now existing
was enough for the
whole Fort. If R.A.
& Infantry commod-
iously use it &
could alternately certain
hours & days could
be told off.

Item 8. The height of
2. In. G. & W. D. extra-
vagance seems reached
when it is proposed
build a chest for
5 Sergeants at nearly
£200 a piece !! A dry
chest is a wholesome institution

but please see

My dear Michael,

I spoke to Sir Neville about my letter No 1181. As the subject of the precaut[ionary] Expenditure on military buildings cannot be rightly considered without taking into account the proposed withdrawal of British troops from Trichinopoly, he thought para 2 of my letter had better remain and that the best way of settling the matter would be to make the letter Confidential. This I have done. I send the letter with this

SIR,

The Government of India desires to obtain a forecast of the expenditure remaining to be incurred on Military Works throughout India. I am therefore directed to request that such a forecast may, under the orders of His Grace the Governor of Madras, be prepared in the accompanying forms and submitted with the least possible delay.

2. The statement showing the buildings yet required to complete the accommodation for troops according to the scale now authorized should be comprehensive, and include all buildings required to bring the Military accommodation up to the standard laid down by the Military Department.

3. In stations where the requirements have not as yet been ascertained, Committees should be assembled for this purpose, and their reports taken as the basis for the preparation of Statement A (sub-heads 1 to 15 of Statement B). The Government of India will thus be placed in possession of complete information as to the extent and cost of the accommodation yet required to be provided for the army of India, both European and Native. An appendix should be added detailing the requirements of each station in order of urgency.

4. The amounts shown under the remaining sub-heads (15 to 39) of Statement B should provide for all requirements other than those coming under the special denomination of "accommodation for troops."

5. As it is very desirable that this forecast should be in the hands of the Financial Department before the publication of the Budget statement for 1879-80, I am to request that the information may, if practicable, be forwarded to this Office not later than the end of February 1879.

GOVERNMENT OF MADRAS.

PUBLIC DEPARTMENT.

5th July 1879, No. 1037.

Correspondence.

No. 25. *Proceedings of Government, dated 5th July* 1879, *No.* 1037.

The attention of the Government has been drawn to the great delay, which is of frequent occurrence, in the disposal of references circulated for the preparation of information on various points, as well as to the inattention displayed in supplying by due date indents and other periodical statements.

2. Such laxity casts discredit on Government and is entirely subversive of any regular system and conduct of business.

3. Heads of Departments are warned that it is their special duty to see that all indents, estimates, and returns due on fixed dates are so rendered punctually and completely; and to this end that the various branches of their departments are duly preparing in sufficient time the parts appertaining to each branch. Heads of Departments are and will be held responsible for any failure of their subordinates in these matters.

4. It must also be clearly understood by Heads of Departments that when information is called for by the Government of India or other authority, it must be furnished *at once* so far as the questions put are capable of immediate reply. Where time may be required to obtain necessary facts or opinions an immediate acknowledgment must be made, stating how soon the remaining information can probably be supplied. Generally some portion of the information required can be furnished at once, and this must not be postponed because other parts have to stand over pending inquiry.

5. Promptness in such matters will invariably be found to shorten and simplify business, while delays like those noticed above inevitably lengthen and complicate the most ordinary transactions.

6. His Grace the Governor in Council looks to the responsible officers concerned to prevent any future slur on the administration in respect of such delay and neglect.
