Superintending Engineer's Office
Camp Palan Aricuti. 19th July 1881.

N^o 306

From The Superintending Engineer
Second Circle

To

The Chief Engineer
P. O. Department.

Sir

With reference to your Memo N^o 289 regarding the Cruz Milagre Dam. I have the honor to report that the following arrangement (which I believed had been finally settled) should be made with regard to the maintenance of the Dam and also of the groynes at Cochin.

That the Dam, groynes &c. should be all in the charge of the Port Officer at Cochin, who should under the Marine Department carry out all necessary repairs to them, the cost of which do not exceed Rs 1000 and even repairs exceeding that

amount

amount under special arrangement.

That the P. W. Department should when called on give their advice regarding the repairs &c. and should also occasionally inspect the works and if necessary report on their state and advise any action they considered necessary being taken.

2. I must point out that it is impossible for this department to undertake the necessary petty repairs of these works as we have no subordinate at Cochin and the head-quarters of the nearest one is at Calicut 100 miles north. The work can easily be done by the Port Officer and the Master Attendant has no objection to his undertaking it.

3. With regard to the latter portion of Captain Taylor's letter in which he says it is to be understood that the work of maintenance is not debitable to Port Funds

I have the honor to point out that as both the dam and groynes are maintained in the interests of the Port and have been so for years. I think Captain Taylor is

mistaken

mistaken and request that this point may be decided as soon as possible and that I may be informed to what fund the repairs are to be debited.

4. I will at once address the Port Officer and request him to execute any necessary emergent repairs and offer if necessary to advance him funds for the work and I request permission and orders to hand over formal charge of the Dam and groynes to the Port Officer.

I have the honor to be

Sir

Your most Obedt. Servant.

Major R. G.
Superintending Engineer & Civil

PROCEEDINGS of the MADRAS GOVERNMENT.

Under date the 1st August 1881

Read the following

from

The Supg Engineer, Madras
Civil

(N^o 306 of 19th July 1881)

The arrangements proposed
by the Superintending Engineer
for future guidance in connection
with the Army Apileague
San and Grogues at Cutchin
are approved.

2. The Master Attendant,
Administrative Dept. will
be requested to explain, more
fully his objection to the
debit to Port funds of the
cost of maintenance, and to
state how past expenditure

has been charged. A final
decision on this point will
be given on receipt of
Captain Taylor's reply.
