GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

5th October 1881, No. 2453 W.

Buildings and Roads.
Civil Works.

Read the following paper :—

No. 25. Endorsement of the Chief Engineer for Irrigation, dated Ootacamund, 10th September 1881, No. 32 E.W.

From G. T. WALCH, Esq., Superintendent of Works, Godávari, to the Chief Engineer for Irrigation, dated Dowlaishweram, 28th August 1881, No. 1,364.

In accordance with paragraph 1,135 of the Public Works Code, I have the honor to submit, for your consideration, important structural alterations which I recommend should be made in the masonry work (no alteration is proposed in the *iron* work) of the bridge over the Kovúr-Munjair Junction Canal under the Kotipalle road; one of the works sanctioned in G.O., No. 2,776, 17th October 1876, on your recommendation.

2. The alterations are chiefly—
(1) Improvement in the forms of the wings.
(2) Do. in the form of the tow-paths.
(3) The reduction of the depth of foundations from 6 feet 6 inches below canal bed to 3 feet below the bed.

3. The original and revised plans herewith show clearly the details of the proposed alterations, and I think it is only the reduction of the depth of foundations which requires remark. With reference to *that*—
(*a*) The canal is a still-water one and therefore there will be no current through the bridge.
(*b*) Trial pits have shewn that the character of the soil is no better for foundations below the level now proposed than at that level; it is nearly pure sand.

4. The estimated cost of the revised design for masonry alone (Rs. 3,400) is Rs. 1,640 less than the original sanctioned estimate (Rs. 5,040) for that portion of the work.

Forwarded to the Chief Engineer, Roads and Buildings Branch, for disposal of the part of the reference relating to the structural design of the bridge.

2. The only two points with which the undersigned is concerned are—

1*st*, the tow-path arrangements,
2*nd*, the head-way.

Plan, dated 18th August 1876.
" " 23rd November 1880.
1 Detailed Estimate.
1 Abstract "

With regard to the first no alteration of masonry will be needed, and the small modification of the earthwork arrangements necessary to convenience has been indicated in pencil on the plan, and the attention of the Superintendent of Works drawn thereto.

The head-way has been reduced from 13 to 12 feet and the latter will suffice, but the Superintendent of Works has been informed that no further reduction should be made.

(Signed) JOHN MULLINS, Colonel, R.E.,
Chief Engineer for Irrigation.

No. 26. ORDER THEREON, 5th October 1881, No. 2453 W.

THE revised estimate, amounting to Rs. 3,400, for alterations in the masonry work of the bridge over the Kovúr-Munjair Junction Canal under the Kotipalle road, is sanctioned.

2. This work is a portion of the project referred to in G.O., No. 2776, dated 17th October 1876, and the revised estimate now submitted is less by Rs. 1,640 than the original one for Rs. 5,040 for the same portion, sanctioned in the above Government Order. The alterations are chiefly :—

(1.) Improvements in the form of the wings.
(2.) Do. of the tow-paths.
(3.) A reduction in the depth of foundation from 6 feet 6 inches to 3 feet below canal bed.

3. The arrangements relating to the tow-paths and the head-way have been disposed of by the Chief Engineer for Irrigation.

4. This sanction has been registered as Incorporated Local (Canal and Ferry Fund) No. 29 W. of 1881-82, and classified as Communications, Original Works.
