2 Abett Estimates Bullock draught with troughs for
1 Plan watering horses, Wells Nos 3 and 7
in the South Barracks & Begun's
Compound at St Thomas' Mount
in Chingleput Division.

Well N^o 3 — A masonry trough
52½ x 4½ ft. is proposed to be con-
structed at the side of the present
Ramp Wall for the purpose of allowing
horses to drink water. At present
the water is carried by coolies from
the Cistern (filled by Mavalay) and
filled in a wooden trough, kept for
the purpose near the Well.

Well N^o 7 — Much inconvenience
is felt by drawing the supply of
water from the Well by coolies
with

with buckets, it is further more
an expensive process. It is therefore
proposed to build a masonry trough
and "Kavalong" similar to that of
No. 3 Well, as shown in the enclosed
plan.

The above arrangement will
save the trouble of filling water
by Coolies whose services might
be dispensed with.

The plan and estimate have
been approved by the Military Autho-
rities and it is requested that the
enclosed Abstract estimate
amounting to Rupees 655 may be
sanctioned and funds provided
for carrying out the work which may
be expected to be completed within
3 months from the date of putting it
in hand.
