From,

The Superintending Engineer
First Circle

To,

The Chief Engineer
for Irrigation.

Sir,

Dowlaislueram 5th Nov. 1881.

Depy Secy -

With reference to your No. 149 G.D. (Confidential), I have the honor to report that I have on inquiry ascertained that in July last a man fell off a Radari boat during the night in Chintapalli Lock and was drowned.

(2) The latter part of your Memo under reply would seem to suggest that you consider that accidents taking place on canals or other works under charge of this Department ought to be reported to you even though such accidents have nothing to do with the execution of work. This has never as far as I know been hitherto understood to be necessary.

I have the honor to be
Sir

Your Most Obedient Servant.

C. P. Walch

As Superintending Engineer 1st Circle

Submitted to Government.

2. The accident referred to occurred it will be seen by a fall from a boat - not from a lock wall
3. It is not usual either in India or elsewhere to build parapet walls along the walls of locks. They would be very much in the way and with reasonable care accidents from people tumbling into canals at locks should be very rare. Properly no one but the lock men and a part of the crew engaged in passing a boat through a lock should be on the lock platform at all, and as regards these men parapets would materially increase the risk of accidents

Sanjiv Lal Rao
Chief Engineer for Navigation
