SUPERINTENDING ENGINEER'S OFFICE,

No. 241.

MADRAS,
5th Circle,
Chepauk, 29th November 1881.

From *Col. H. L. Freudergast. P. E.*
SUPERINTENDING ENGINEER,
5th Circle,

To

THE Chief Engineer
S. W. Deptt.

SIR,

Enclosures.

With reference to your Memorandum of 26th dated 8th November 1881, I have the honor to observe ^{that} I consider there is no need of stock being kept under the heads "Small Stores", "Metals" & "house fittings". The Executive Engineer states that he found a supply when he took charge of the Division, but that he will not keep any more of these materials, when his present supply has been used.

It would be unprofitable to sell off these stores, and they ought gradually to disappear from the books.

2 There is found to be much difficulty in obtaining a regular supply of Chunam shells, and they have to be taken at the times when the merchants bring up their supplies. Hence it appears to be advisable that there should be a stock of six months average consumption, of the value of about Rs. 6000.

Charcoal is obtained on two months notice, and it is not necessary to keep in hand more than two months supply, of the value of Rs. 3000.

I therefore recommend that Reserve Stock may be allowed to the extent asked for, under Building Materials and Fuel.

3. I consider it quite impracticable to close the Manufacture of lime. There was correspondence on the subject last year, and this ended with the Orders of the 4th September 1880 No. 2086 &c, that the lime kilns were to be worked in the Presidency Division.

I have the honor to be

Yours Most Obedt Servt
Wm. Pendergast
