

GOVERNMENT OF MADRAS.

MILITARY DEPARTMENT.

28th February 1881, No. 1190.

Military Buildings—Workshops.

Read the following papers:—

No. 444. *From Surgeon-General W. R. CORNISH, F.R.C.S., C.I.E., Surgeon-General with the Government of Madras, to Colonel E. L. HANKIN, Acting Secretary to Government, Military Department; dated Fort St. George, 16th February 1881, No. 62.*

I have the honor to bring to the notice of the Right Honorable the Governor in Council that the sanction accorded in G.O., No. 7037, dated 6th November 1880, para. 5, to the setting-up of certain boilers and evaporating pans, has not up to date been acted on, owing to the correspondence with the Government of Bombay regarding certain apparatus said to have been required by the Bombay Medical Stores for their manufactory.

2. In G.O., No. 43, of 6th January 1881, the reply of the Government of Bombay is stated to the effect that the apparatus is not required at Bombay, and I have therefore the honor to solicit the sanction of the Right Honorable the Governor in Council to the various articles being set up in the Madras Medical Stores.

3. The cost of setting up the machinery, &c., estimated by the Public Works Department in the accompanying letter, is as follows:—

	RS.
1. Construction of a boiler-room	685
2. Setting-up machinery and making cast-iron jackets for evaporating pans, &c.	2,000
3. Cost of steam-engine and lathes	1,800

The last of these items—steam-engine and lathes—will be simply a book transaction between the Public Works and Medical Departments. The sanction of

* Two thousand, six hundred and eighty-five. Government is needed to the extent of Rs. 2,685,* to enable the Public Works Department to execute the work of constructing a boiler-room, and of setting up the machinery.

From Lieutenant W. L. C. BADDELEY, R.E., General Superintendent, Public Works Workshops, to the Secretary to the Surgeon-General, Indian Medical Department; dated Madras, 14th February 1881, No. 2893-W.

With reference to your No. 745, of 7th February 1881, I have the honor to inform you that the room required for the boiler has not yet been constructed, and consequently it is impossible for the Workshop to take any steps towards fitting up the boiler.

2. An estimate for a boiler-room, amounting to Rs. 685, was framed by the Assistant Engineer in charge, Presidency Division, but no sanction appears to have been accorded by Government for executing the work.

In order, therefore, to carry out the whole scheme as originally arranged, it will be necessary for Government to sanction the following amounts :—

Construction of boiler-room	Rs. 685
Setting-up machinery and making cast-iron jackets for evaporating pans, &c.	2,000
Cost of steam-engine and lathes	1,800

The last item will be simply a book transaction between the Public Works and Medical Departments.
