

No. 3220.

SUPERINTENDING ENGINEER'S OFFICE,
MADRAS,
Chempauk, 12th Febry 1881.

From

THE SUPERINTENDING ENGINEER,
1ST CIRCLE,

To

THE Chief Engineer
O. N. D.
Madras.

SIR,

Enclosures.

With reference to G.O. No. 55877 of the 21st February 1879 I have the honour to report that the Salug. Cut. Cherry at Pankonda was built with a Bengal terrace roof and the plaster has become covered with minute cracks, so that the rain water soaks through.

This state of ^{the} roof is attributed to the inferior quality of mortar used in laying the flat tiles and in the plastering above. 2. The roof requires renewal with new materials to make it water tight, and it seems to be advisable to put on the ordinary tiled roof which is in accordance with the design of the structure on the standard plan.

I understand that Col. A. S. Mobley obtained sanction for the change to the semi terrace covering of the building, but it has not been successful.

3. The Culcherry was commenced in 1872 and completed in 1876. Serint and Assistant Commissary Haddack was in charge of the Puntkonda Range upto June 1874, and the work was nearly finished in his time.

4. An Estimate of Rs. 1898 has been prepared for the necessary repairs, but there are no funds available in the P. W. Department.

5. I have not myself thought it advisable to undertake out-lying works at a distance from the Executive Staff. But as I have been directed by your Memo No 232 of the 2^d February, to arrange for a Post Office to be built at Puntkonda, I have given instructions, that Supervisor Frank Jones should inspect the work twice or three times, he being now at Dhur. maverum on special irrigation duty.

to be done at present
R. S. 14/2

Hence when there is one work in the place, a second can also be undertaken, if funds can be allotted.

I have the honour to be
Sir.

Your obedient servant.

Ch. W. S. S. S.
Superintending Engineer
14/2
