No. 4.386

MADRAS,
Chepauk, 1st March 1889.

From

THE SUPERINTENDENT OF WORKS,
PRESIDENCY,

To

The Chief Engineer,

P. W. Department.

Sir,

Enclosures.

I have the honor to state that Scaffolding is being erected for examining and repairing the Lightning Conductors of St. Mary's Church. Advantages might be taken of the Scaffolding to replaster the Steeple and I request to be informed whether the Steeple may be replastered. It might be done with Morgan's Cement and then coloured (Portland Stone Colour) with a mixture of paint and cement.

1 part Leeson's paint

4 - - - Portland cement powder

to be mixed with linseed oil.

I have the honor to be

Sir,

Your Most Obedt. Servant

To
The Honble: R. Davidson, C. S. S.,
Chief Secretary to Government,
Fort St. George.

Sir,
In reply to your Endorsement,
No. 448, dated 7th March 1881, I have
the honor to state that it appears to be
desirable to cover the steeple of St. Mary's
Church with cement as proposed by the
Chief Engineer.

2. - Last year the body of the
Church and the lower part of the tower
were successfully covered with Portland
cement. The work now proposed would
complete the protection of the building
from corrosion by the salt atmosphere
of the beach. -

I have the honor to be,
Sir,
Your Most Obedt. Servant,
L. Warlow.
Actg. Archdeacon.

Endorsement from the Public
Works Department, 24th March 1881, N^o 540.

Letter from the Venble the
Archdeacon, Madras, 29th March
1881, N^o 123.

Returned to the Public Works
Department with the remark that
there is no objection to replastering
what appears to have been already
plastered, but the existing coloring
should as far as possible be retained.
